PAKISTAN SCHOOL EDUCATION STATISTICS 2003-2004

## Foreword

The availability of valid, reliable, comprehensive and educational statistics are pre-requisite for pragmatic planning and decision-making, monitoring and evaluation of education system. The National Education Management Information Systems (NEMIS) functioning in AEPAM is responsible for data-collection of ICT and consolidation of data at national level provided by provincial/ regional EMIS units. The NEMIS also provides technical support to the provincial/ regional EMISs to enhance their data generating capacity.

The current NEMIS report is containing educational data pertaining to public sector educational institutions managed by Ministry of Education/ Education Departments, other public educational institutions managed by other than the Ministry of Education/ Education Departments, private educational institutions, technical and vocational institutions, teacher training institutions, colleges, deeni madaris and universities. Usually the Provincial/ Regional EMISs provide education data of only public sector educational institutions up to higher secondary level, whereas, they do not provide data in respect of the other than institutions. Efforts have been made to get data from all the sources at federal and provincial levels, which have been incorporated in this report. We have tried our best to indicate the source for obtaining data for this report. The figures of private schools reported in this document are estimated based on Census of Private Educational Institutions in Pakistan, conducted by Federal Bureau of Statistics in 1999 and the National Sample Survey of Private Schools in Pakistan conducted by AEPAM in 2004.

The Annual National Education Statistics Reports have been published by AEPAM since 1992-93. The present report is the 12<sup>th</sup> National Report of the series. The report contains information in respect of number of educational institutions, enrolment, teachers and physical facilities. The figures are categorized by gender and location for each province/region in case of public educational institutions. It is expected that the information given in the report will reveal trends and important milestones in the system as a whole and lead as a catalyst in the process of setting goals and targets at micro and macro level planning and decision making.

I would like to appreciate the help and support of the provincial/regional EMIS units of Punjab, Sindh, NWFP, Balochistan, FANA, FATA, and AJK who have provided the provincial/ regional consolidated data for incorporation in this national report. I would also like to express my gratitude to the educational managers of ICT for their help and support in conducting school census in ICT. I would also like to acknowledge the efforts made by the NEMIS team for producing this report. This report contains first-hand and valuable information, which will facilitate the educational planners and decision-makers in rational decision-making.

**Dr. P.A. Shami**  
Izaz-o-Fazeelat  
Director General

## Introduction

This report is the outcome of inputs given by the Provincial/ regional EMISs. Moreover, the relevant data in respect of other public institutions run by other than Ministry of Education/ Education Departments has been collected from the concerned institutions. Their respective departments of the Provincial/ Regional governments have provided the data in respect of technical and vocational institutions and teacher training institutions. Deeni Madaris data was collected from the concerned agencies. The figures of private schools reported in this document are estimated based on Census of Private Educational Institutions in Pakistan, conducted by Federal Bureau of Statistics in 1999 and the National Sample Survey of Private Schools in Pakistan conducted by AEPAM in 2004.

It also contains class wise enrolment, number of teachers and availability of physical facilities by province/ regions, location and gender in case of public schools. In case of other educational institutions consolidated figures by level, gender and location have been given in the report. The following account relates to a brief introduction of AEPAM and different aspects of NEMIS, its collaborators, school census, and reporting.

### Academy of Educational Planning and Management (AEPAM)

The Academy was established in 1982 as professional organization of the Ministry of Education. It has a Board of Governors, which is chaired by Federal Education Secretary. The Academy is headed by Director General with 11 Faculty Members including Director General. Majority of Faculty Members are foreign qualified, having diversified background in education. The Academy is mainly charged with responsibilities of training of Educational Administrators, Managers, and Planners; conducting research regarding issues related to various aspects of Education Development, strengthening MIS and Education Statistics activities; and providing Documentation Services.

The Academy has conducted about 300 training programmes so far. A corps of more than 5000 educational personnel has been trained. More than 260 research studies, surveys, and reports and numerous research papers were produced. The Library has more than 10,000 research reports, documents and papers on EPM and allied disciplines in its computerized database for easy retrieval and quick access to relevant information. 162 Annual Education Statistics reports, surveys and studies including ICT, FATA and FANA reports were published so far.

### National Educational Management Information System (NEMIS)

Until 1982 with the exception of NWFP, there was no computerized database available in the country's education system. However, in the rest of Pakistan, manual facilities were existed which appeared outdated, obsolete, time consuming and also unreliable. Thus, the data made available was normally two to three years old. Moreover, there was

previously technical discrepancies and no assurance of the quality of data, consequently defective planning. A definite need was, therefore, felt to improve the data collection mechanism, its reliability, relevance and also prompt availability, so as to bring it at par with NWFP where a first pilot EMIS project, which was established (1980-83) by Management Unit for Study and Training (MUST) in Peshawar. It computerized educational data and established an EMIS for the school department. Later on, not only the activities of MUST were expanded to cover about 75% of all the schools in the province but it also covered all colleges in the province. Following the MUST model, NEMIS Project was initiated during 1991-93.

AEPAM is functioning as a pioneer organization for establishing computerized EMIS in the country and has been providing baseline education data to various agencies for planning, monitoring and policy formulation. NEMIS Project phase-I was launched during 1990-1993, with the assistance of UNESCO, UNDP and USAID. Previously, it was undertaken by Central Bureau of Education (CBE). However, the first national school census in the history of the country was conducted and field data was collected during 1991-92. This project paved the way in the establishment of a network of IBM compatible microcomputers throughout education system of Pakistan at district level and it was spread over seven key locations (Islamabad, Karachi, Lahore, Peshawar, Quetta, Muzaffarabad and Gilgit) to cover almost all district in each province/region. This project was completed in June 1993.

After abolition of the Central Bureau of Education (CBE), the project was shifted to the Academy in view of its professional and technical expertise. The Federal Educational Management Information Systems (FedEMIS) project was approved at a cost of Rs.12.395 million in 1994 for a period of two years (1994-95 and 1995-96). It was accomplished during 1997-98. The major objectives of the FedEMIS project were:

- Providing technical support for establishing a strong database at district level in each province.
- Making available a database to researchers for policy options, projection and diagnostic purposes and to decision-makers for policy formulation;
- Enabling education administrators and managers to have easy and quick access to information and documentation for efficient administration and effective monitoring;
- Coordinating, overseeing and guiding similar projects which have been established in the four provinces; and
- Assist in collecting, processing and analysing educational data relating to ICT, FATA, FANA and AJK.

NEMIS phase-II project was approved at a cost of Rs.18.045 million in May 1997. The duration of project was three years (1998-2001). The NEMIS phase-II project as per approved scheduled was supposed to close on 30<sup>th</sup> June 2002

but due to financial implications the closing period of this project was extended upto 30<sup>th</sup> June 2003. The project is being implemented by Academy and financed under SAP-II component of education. The main objectives of the Project were to provide the infrastructure for EMIS and develop the mechanism for collecting educational data/statistics, particularly from the Federal Areas (Federally Administered Tribal Areas (FATA), Federally Administered Northern Areas (FANA), Azad Jammu and Kashmir (AJK), and Islamabad Capital Territory (ICT)). Further, provincial EMISs will transmit data to the AEPAM for consolidation and development of viable indicators to monitor the progress at national level under SAP-II. Under this project 75 workshops were conducted and about 1700 computer/educational personnel were trained. Fifteen meetings of different NEMIS committees were held and about 165 reports including studies/surveys, census reports and papers were produced.

In continuation of NEMIS-II its next phase in the form of Project NEMIS-III was approved at a cost of Rs. 37.4 million by DDWP in its meeting held on 1st April 2002. The duration of project is 36 months (2003 to 2006). The implementation of the project started from 1st July 2003. Following are the main objectives of the project:

- To enhance data generation capabilities of the Provincial & District EMISs.
- To develop management capacity building of education managers to use data in decision-making.
- To develop and maintain website for NEMIS.
- To assist provincial EMIS centers in the development of software programs.
- To provide data required by Federal Government and International agencies.

Following are the main achievements of NEMIS from 1<sup>st</sup> July 2003 up to April 2005:

S.No	Activities	2003-04	2004-05	Total
1.	Workshops conducted	16	8	24
2.	Personnel trained	304	136	440
3.	Meetings of regulatory committees held	4	3	7
4.	Annual School Census conducted for ICT	1	-	1
5.	Research studies conducted	4	-	4
6.	Research studies being conducted	-	2	2
7.	Annual Statistical Reports published	2	-	2

## Data Compilation Mechanism

NEMIS is the coordinating unit for education statistics/data collection, compilation, report generation and providing technical support to the provincial EMIS units. Each province has established its own EMIS unit in early 1990. Currently, the Academy of Educational Planning and Management in collaboration with Federal Directorate of Education conducted Annual School Census for Islamabad Capital Territory (ICT). The FATA EMIS unit has been established in 2002 and it will conduct school census for the year 2002-2003. FANA and AJK have already established its EMIS units in 1998 and responsible for collection and compilation of education statistics. The AEPAM has provided technical support for the establishment of these units. The provincial EMIS units are responsible for collection, compilation, analysis and dissemination of education statistics/data of their respective provinces. These provincial units usually collect data through their district EMIS cells by conducting annual school census. The annual school census is usually conducted in October/November by each province. The provincial data is transmitted to NEMIS for consolidation at national level.

AEPAM plays a leading coordination role in addressing crucial issues and problems in respect of compatibility of questionnaires, statistical terminology, data requirement for development of core educational indicators, discrepancy and inconsistency in data, data reliability and validity, non-availability of data on private schools and timely availability of data. Various regulatory committees have been constituted under the NEMIS to discuss and resolves these issues. AEPAM under NEMIS has established a regular mechanism for coordinating and monitoring with provincial/ regional EMISs.

## Pakistan School Education Statistics

The NEMIS produces an annual publication of National Education Statistics that presents a consolidated picture of all educational institutions in the country. The annual National Education Statistics report has been published by AEPAM since 1992-93. The present report is 12<sup>th</sup> in a series. The report contains the total number of public and private schools up to secondary level by gender and location. It also contains the total number of arts and science colleges, technical and vocational institutions, teacher training institutions, deeni madaris and universities. There are 201,152 schools up to higher secondary level including public schools, other public schools run by other than Ministry of Education/ Education Departments and private schools. Out of the total 154,970 are primary schools, 28,727 are middle schools, 16,106 high schools and 1349 higher secondary schools. The total enrolment from primary up to higher secondary stage 26,099,584 out of which 19,781,216 at primary stage, 4,321,261 at middle stage, 1,799,591 at high stage and 197,517 at higher secondary stage. The total number of teachers from primary up to higher secondary level is 989,503 out of which 432,222 at primary level, 239,351 at middle level, 276,916 at high level and 41,014 at higher secondary level.

The total number of Arts and Science Colleges is 990 with the enrolment of 822,518 and the number of teachers are 28,112. The total number of the technical and vocational institutions are 624 with the enrolment of 104,590. The number of teachers are 7,042 working in technical and vocational institutions. The total number of the teacher training

institutions are 114 with enrolment of 27,079. The number of teachers working in these institutions are 2,587. There are 103 universities out of which 53 universities are functioning in the public sector and the remaining 50 universities are functioning under the private sector. The total enrolment in the universities are 520,666 out of which 458,074 students are enrolled in public universities whereas, 62,592 students enrolled in private universities. The total number of teachers are 60,633 out of which 53,557 are working in the public universities, whereas, 7,076 are working in the private universities. The total number of deeni madaris is 11,351 with enrolment of 1,457,189 students. The number of teachers is 9,237 in the deeni madaris.

The report contains class-wise enrolment (from pre primary up to class 12) of only public sector by gender and location for each region/province. The report also presents number of teachers by level from primary to higher secondary by professional qualifications and academic qualifications by gender and location for each region and province. The report also provides information regarding availability of physical facility in the educational institutions up to higher secondary stage by gender and location for each region and province. The figures reported in the reports are based on the annual school census conducted by provincial/regional EMIS units. These figures have been provided by the provincial EMIS units to NEMIS. Estimations have been made where the figures are not available.
