## MESSAGE FROM SECRETARY

Education plays the most important role in development of nations. The government assigns highest priority to developing a high quality, equitable and widely accessible education system in Pakistan. The management of such an education system necessitates informed decision making. It is need of the hour to have widespread information dissemination mechanisms to facilitate different levels of management in the education sector.

The Ministry of Professional and Technical Training has the National Education Management Information System (NEMIS) at the Academy of Educational Planning and Management (AEPAM). The responsibility of NEMIS is to collate, consolidate, and analyze national education data and generate useful information to cater to the needs of policy makers, planners, managers and decision makers. NEMIS has identified and implemented a wide variety of information dissemination mechanisms. It has been publishing Pakistan Education Statistics report regularly.

I am pleased to note that, for the first time, the Pakistan Education Statistics report contains a detailed analysis of education system in Pakistan. This initiative is an important step towards increased utilization of education statistics. Its potential to prompt improvement is significant as it can assist in informed decision making by education managers, facilitate education sector research, and serve as a source of reliable information for international organizations.

Qamar Zaman Chaudhry  
Secretary,  
Ministry of Professional  
and Technical Training
