Message from the Federal Minister

Accurate and comprehensive data is the foundation upon which effective educational policies and plans are built. The Pakistan Education Statistics Report plays a crucial role in providing policymakers with reliable data on different aspects of education system enabling government to allocate resources efficiently, target interventions where they are most needed, and monitor the impact of policies over time.

The Pakistan Education Statistics Report 2022-23 marks another pivotal milestone in our journey towards educational excellence. The comprehensive data presented in the Pakistan Education Statistics Report continues to illuminate the landscape of Pakistan's education system, while providing guidance towards a brighter future. This report not only reflects the progress but also highlights the areas where concerted efforts are needed to achieve our goals of universalizing quality education.

I am confident that the insights and indicators provided in this report will empower federal and provincial governments to further enhance the effectiveness and equity of our education system. Under the steadfast leadership of Mr. Mohyuddin Ahmad Wani, Federal Secretary Education and Dr. Muhammad Shahid Soroya, Director General PIE, the MIS team continues to demonstrate exceptional commitment to delivering timely and reliable education statistics.

Let us leverage the findings of this report to shape policies that nurture our children's potential, strengthen our workforce, and propel Pakistan towards a prosperous future driven by knowledge and innovation.

Dr. Khalid Maqbool Siddiqui Federal Minister Ministry of Federal Education and Professional Training

Message from the Federal Secretary

Pakistan Education Statistics 2022-23 not only builds upon its predecessor's rigorous data analysis but also explores the evolving challenges and opportunities within our education landscape while shedding light on areas that require targeted interventions to ensure continuity and quality in learning for all students. The comprehensive data for all sectors and levels provides a clear picture of progress made and areas requiring further attention.

The report goes beyond presenting raw data and provides rigorous analysis, identify key trends and challenges that can inform targeted interventions by policymakers and planners. Continuing the legacy of earlier educational interventions, the population-based indicators offer valuable insights into enrollment patterns, progression rates, and transitions between educational levels.

This edition reaffirms the Ministry of Federal Education and Professional Training's commitment to fulfilling Article 25-A of the Constitution, guaranteeing the Right to Education. The data presented in this report plays a pivotal role in guiding our efforts towards fulfilling the constitutional commitment of providing universal access to quality education under Article 25-A.

We envision this report becoming a vital resource for policymakers, education professionals, academics, civil society organizations, and all stakeholders. By informing policies, plans, and priorities, it plays a crucial role in optimizing resource allocation to improve access, quality, and governance within the education sector.

The Ministry encourages all stakeholders to utilize this report not only for improving the education system but also for advancing the quality of education data production and its effective use.

I extend my heartfelt appreciation to Dr. Muhammad Shahid Soroya, DG PIE, whose exemplary leadership and dedication have been instrumental in enriching the quality and relevance of this report. His commitment to advancing education data production has set a benchmark for excellence in our ongoing efforts to strengthen Pakistan's education system.

Let us collectively harness the power of data to drive positive change and propel our nation towards a future where education serves as a catalyst for national development and prosperity.

Mr. Mohyuddin Ahmad Wani Secretary Ministry of Federal Education and Professional Training

Message from the Director General, PIE

Expressing my sincere gratitude, I would like to acknowledge the continued guidance and patronage of the Honorable Federal Minister for Education and Professional Training, Dr. Khalid Maqbool Siddiqui throughout the development process of the Pakistan Education Statistics 2022-23 report. His valuable feedback has significantly enhanced the quality and relevance of the report, making it a comprehensive resource for all stakeholders in the education sector.

On behalf of Pakistan Institute of Education, I am deeply thankful to Mr. Mohyuddin Ahmad Wani, Honorable Federal Secretary Education, for his unwavering support in development of this report. His contributions in advocating for the necessary data for Education Policy, Planning, and Monitoring have added immense value to the report's utility and impact.

I extend special thanks to the data producing agencies at both federal and provincial levels, particularly the EMISs, for their pivotal role in providing accurate and timely data to the Pakistan Institute of Education (PIE). Their commitment to conducting the Annual School Census and other critical data collection activities ensures the reliability and comprehensiveness of the education statistics presented in the report. Additionally, my gratitude extends to the agencies managing administrative data for other education subsectors, conducting censuses, household surveys, and monitoring efforts.

I would also like to commend the dedicated efforts of the MIS team, led by Mr. Safeer Ullah, Director NEMIS, and supported by Mr. Tahir Taj, Joint Director, for their exceptional coordination efforts across federal-provincial and inter-provincial levels. The meticulous work of Mr. Muhammad Bilal Kakli, Deputy Director (Digital Systems), and Mr. Zubair Farooq Piracha, Deputy Director (ICT MIS) in preparing statistical tables has been invaluable. Special mention goes to Mr. Adeel Zia, Data Management Officer for his expertise in data visualizations, Mr. Muhammad Imran Javed, Assistant System Administrator and Mr. Nasir Amin, Consultant PIE for their dedicated contributions.

Dr. Muhammad Shahid Soroya

Director General
Pakistan Institute of Eductaion

Executive Summary

The education system in Pakistan spans multiple levels, with compulsory education for children aged 5-16. This system includes various stages: pre-primary, primary, middle, high, and higher secondary education, collectively referred to as elementary and secondary education. Post-secondary education encompasses college, technical, and tertiary education. Education services are provided by a range of operators, including public sector institutions managed by federal and provincial education departments, other public organizations, and private sector entities such as CSOs, NGOs, INGOs, individuals, and Madaris. Non-formal education and public-private partnerships also play significant roles.

In 2022-23, the education system in Pakistan consisted of 349,909 educational institutions, serving 56,069,332 enrolled students and employing a teaching workforce of 2,573,993. Of the total educational institutions, 185,803 are operated by the public sector, while 164,106 are privately managed. Enrollment figures show that 29,997,358 students (54%) are enrolled in public sector institutions, and 26,071,974 students (46%) are in private sector institutions. The public sector employs 995,643 teachers (39%), whereas the private sector employs 1,578,350 teachers (61%).

Over the five years from 2018-19 to 2022-23, educational institutions increased from 316,876 to 349,909. Student enrollment grew from 53,214,058 to 56,069,332, and the teaching workforce expanded from 2,093,311 to 2,573,993. These trends indicate consistent growth in the education sector.

There are 136,687 primary schools out of total 234,213, making up 58% of the formal school education sector. Enrolment at primary stage is 20,645,826. The majority (83%) of primary schools are in rural areas. Middle school education consists of 51,033 institutions and 8,282,131 students, with a 46% female share. There are 39,389 high schools with an enrolment of 4,135,635 students. Higher secondary education comprises 7,072 institutions and 2,331,326 enrolments. Public-private partnerships operate 10,382 schools, constituting 3% of education system. These schools enroll 3,510,594 students, with a teaching workforce of 126,474. There are 64,417 deeni madaris, providing education to 3,346,923 students, with a male majority (61%). Pakistan has 247 universities with a total enrolment of 1,936,329 students.

The Gross Intake Ratio in the first grade of primary education is 91%, with a gender breakdown of 97% for males and 84% for females. The GIR to the previous grade of primary is 68% and to the last grade of middle is 49% indicating significant dropout rates between primary and middle education levels.

The GER in pre-primary is 76% while it is 78% for primary education (83% for males and 72% for females). The GER drops to 54% at middle level and further shrink to 43% at the secondary

Executive Summary

level. The GER in higher secondary education is merely 22%. The GER decreases significantly from primary (78%) to higher secondary (22%), highlighting retention challenges. Nationally, 63% of primary students and 65% of middle students are overage.

Out of the total students enrolled in grade 1, 80% successfully reaches at grade 5. At the national level, 83% of students successfully transition from primary to middle education while in the case of transition from middle to secondary education, it is 92%. The national PTR is 32, indicating an average of 32 students per teacher in public schools from primary to higher secondary level.

Out-of-school children (OOSC) are a significant challenge in Pakistan's education system. With 26.09 million children not attending school (as of 2022-23), representing 38% of the total school-age population. 35% population portion of primary, 28% of middle, 41% of high, and 59% of higher secondary are out of school. At the primary level, 39% of females are out of school, compared to 32% of males. This gender gap widens at higher educational levels. In each category (primary, middle, high, and higher secondary), the percentage of out-of-school females is consistently higher than that of males.

Out of school children for age 5-16 are 26.089 million in Pakistan (13.712 million girls). There are 5.795 million (39%) out-of-school girls compared to 5.060 million (32%) out-of-school boys, resulting in the total of 10.855 million out-of-school children of primary age group. 2.788 million (34%) girls compared to 2.062 million (23%) boys (a total 4.850 million children) are out of school with age group of middle education. A similar number is observed in the secondary education age group where 4.404 million children are out of school of which 2.163 million (42%) are girls. Out of school children in higher secondary age group are 5.980 million (2.966 million girls) which are 62%.

The overall percentage of OOSC across all educational stages improved from 39% in 2021-22 to 38% in 2022-23. At the primary stage, the OOSC reached 35% in 2022-23 from 36% last year. There was a decline in OOSC at the middle stage, decreasing from 30% in 2021-22 to 28% in 2022-23. Number of OOSC at the high school stage also decreased, dropping from 44% in 2021-22 to 41% in 2022-23. Progress has also been made at the Higher Secondary Level in declining OOSC from 60% in 2021-22 to 59% in 2022-23.

Research indicates that well-designed classrooms and maintained facilities significantly enhance educational quality. While overall trends in facilities provision show stability or a slight decline, with electricity availability decreasing from 70% to 67% and toilet access from 79% to 78%, improvements are needed to maintain and enhance infrastructure quality, nationwide. Punjab leads with 98% of primary schools and 100% of higher secondary schools having electricity, while Balochistan lags significantly with only 15% and 78% respectively.

Executive Summary

Nationally, 72% of primary and 96% of higher secondary schools have access to drinking water. ICT and Punjab excel with nearly all schools equipped with drinking water, whereas Balochistan and AJK struggle, particularly at primary levels with only 23% access to clean drinking water.

Punjab and ICT provide toilets in 99% and 100% of primary schools respectively, contrasting sharply with Balochistan's, 40%. The national average stands at 89% for the middle schools and 97% for the high schools. Punjab and ICT achieve near-universal coverage, while Sindh and Balochistan face challenges at primary levels, indicating gaps in infrastructure development.

CHAPTER 2

DATA COMPILATION MECHANISM

Highlights

The report utilizes the Population Projection provided by the National Institute of Population Studies (NIPS) for the year, 2022 based on Population Census 2017 conducted by the Pakistan Bureau of Statistics.

In most of the provinces, actual data from the private sector (largely of registered schools), non-formal education, religious schools (Deeni Madaris), tertiary education, public-private partnerships, technical and vocational education and training, learning assessments and other public sectors have been presented.

The values of previous year data have been repeated where the data is missing, or projections have been made based on the past trends.

In Pakistan, the term "class" is used to report data/indicators by the national/provincial entities while UNESCO Institute for Statistics (UIS) and other education data reporting agencies at the regional/global level state it as "grade". Therefore, these two terminologies have been used interchangeably throughout this report.

2.1 Data Compilation and Consolidation

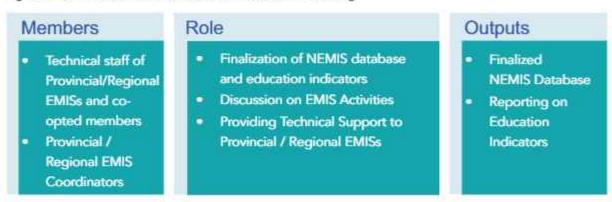

The Pakistan Institute of Education (PIE), acts as a central hub for education data, working closely with data providers across various administrative levels. This collaboration involves regular data exchange, open discussions on educational data, and capacity-building initiatives through workshops, seminars, and official communication channels. While PIE works to ensure data quality, this report acknowledges the limitations. To address this, the report provides a detailed explanation of the data consolidation process and highlights the importance of considering these factors when interpreting the presented education statistics and indicators.

Public sector data forms the major chunk of the education data repository maintained at PIE. Once the Annual School Census exercise is completed by provincial/regional EMISs, the PIE generates a request to these entities for sharing of data on pre-defined variables and coding scheme. The data is then transformed into the national EMIS database. In the meantime, PIE also coordinates with other data-producing agencies belonging to various sub-sectors of education for sharing of data. Once the data sharing is complete, internal checks are applied to ensure data quality. These checks include consistency, integrity and time-series analysis. Subsequently, the education indicators are computed, and statistical tables are prepared.

The Technical and Coordination Committees play a critical role of bridging between the PIE MIS Wing and the Provincial EMISs for education data gathered from all the entities. The Technical Committee (TechCOM), comprising technical specialists from PIE MIS Wing, Provincial EMISs and other data providers, focuses on data management and processing. They ensure provincial data is transformed into a standardized format compatible with the National EMIS database. This refined data is then presented to the Coordination Committee

(CoordCOM) for review. CoordCOM, comprised of senior management from PIE and Provincial EMISs alongside data providers, thoroughly reviews the finalized datasets for approval. This committee also serves another vital purpose: fostering discussions on challenges encountered and lessons learned throughout the data collection process. These insights are then used to develop solutions for future data collection cycles. In essence, these committees play a central role in ensuring the finalization and quality of education data.

Figure 1: Technical and Coordination Committees of PIE MIS Wing

The 7th Joint Session of the TechCOM and CoordCOM Committees, held at the Pakistan Institute of Education from May 28th to 29th, 2024, focused on finalizing education data for the 2022-23 academic year. The committees reviewed, consolidated, and approved the data during the meeting. Beyond data finalization, the session addressed the critical topic of utilizing education data for policy and planning purposes. A case study exploring the Zero OOSC Initiative in ICT (Islamabad Capital Territory) served as a valuable example. Subsequent to endorsement of data by the stakeholders in TechCOM and CoordCOM, the report writing work was carried out.

2.2 Data Sources

2.2.1. Public Sector

Provincial/Regional EMISs conduct Annual School Census (ASC) every year to collect data from all public sector schools on number of institutions, enrolment, teachers, and physical facilities. Therefore, the public sector data reported in Pakistan Education Statistics 2022-23 is provided by respective Provincial/Regional EMISs based on ASC 2022-23.

2.2.2. Private Sector

The private sector holds a significant share of the education system across the country, therefore, tapping private sector data is indispensable. Pakistan Institute of Education maintains frequent connections with private sector regulatory authorities established by respective provinces/areas. The following regulatory authorities have provided data on registered private school operating in their respective provinces.

- Reform Support Unit (RSU), Government of Sindh
- Khyber-Pakhtunkhwa Private Schools Regulatory Authority (KP PSRA)

- Gilgit-Baltistan Education Management Information System (GB EMIS)
- Private Educational Institutions Regulatory Authority (ICT PEIRA)
- Balochistan Education Foundation (BEF)

The data on unregistered private schools is currently unavailable. Consequently, this report underestimates the total private school's enrollment and teachers.

The growth rate observed between Punjab Private School Censuses 2012 and 2016 is used to project private sector data for the year, 2022-23. AJ&K private sector data is projected from the year, 2020-21 based on the national average since historical data is unavailable.

2.2.3. Other Public Sector

In addition to the Ministry of Federal Education and Professional Training at federal level as well as Departments of Education at provincial levels, numerous government ministries and departments offer educational services. These entities are categorized as the "Other Public Sector."

The Pakistan Institute of Education (PIE) proactively reaches out to these organizations, regardless of their core function or national presence, to collect data on educational institutions under its management. This data is crucial for comprehensive education statistics.

Including data from the Other Public Sector is essential for calculating accurate education indicators and understanding the true scope of Pakistan's education system. The report presents aggregated data from these organizations. The following organizations provided actual data of educational institutions under their administrative control:

- Army Public Schools and Colleges System (APSACS)
- ii. Bahria Education & Training Services (BEATS)
- iii. Daanish Schools and Centre of Excellence Authority
- iv. Department for Empowerment of Persons with Disabilities (DEPD) Sindh
- Directorate General of Special Education, Ministry of Human Rights, Islamabad
- Divisional Public School & Inter Colleges (DPS)
- vii. Fauji Foundation
- viii. Federal Government Educational Institutions (Cantts/Garrisons)
- ix. Mines & Minerals Department
- x. National Police Foundation
- xi. Overseas Pakistanis Foundation (OPF)
- Pakistan Air Force (PAF)
- xiii. Pakistan Atomic Energy Commission (PAEC)
- xiv. Pakistan Bait-ul-Mal
- Pakistan Navy (PN)
- Pakistan Ordinance Factories (POF) C/G
- xvii. Pakistan Railways (PR)
- xviii. Pakistan Rangers
- xix. Pakistan Steel Mills
- xx. Social Welfare and Special Education Department, Govt. of Balochistan

Pakistan Education Statistics 2022-23

xxi. Special Education Department, Government of Gilgit-Baltistan

xxii. Special Education Department, Government of Punjab

xxiii. Telecom Foundation

xxiv. Water and Power Development Authority (WAPDA)

xxv. Zakat, Ushr, Social Welfare and Special Education Department, Government of

Khyber-Pakhtunkhwa

2.2.4. Intermediate and Degree Colleges

Provincial higher education departments manage the matters of the intermediate and degree colleges operating mostly from classes 11 to 16. Therefore, these departments look after the affairs of the public sector colleges. None of the provincial/regional departments manage databank of private sector colleges except Higher Education Regulatory Authority (HERA), in Khyber-Pakhtunkhwa. Therefore, the public sector data of intermediate and degree colleges is provided by respective provincial higher education department. Sindh public sector data was unavailable therefore previous year data was repeated. Private sector data of colleges is projected based on the previous trends except KP where HERA has provided actual data of private sector colleges.

2.2.5. Tertiary Education

Higher Education Commission is the custodian of Tertiary Education data in Pakistan. Tertiary Education data for the year, 2022-23 is unavailable, therefore, data for the year, 2021-22 was repeated.

2.2.6. Non-Formal Education

Pakistan Institute of Education in collaboration with the Japan International Cooperation Agency (JICA) is maintaining the Non-Formal Education Management Information System (NF-EMIS) which contains data of all NFE centers operating across the country in public and private sectors. The Technical Committee and Coordination Committee for NF-EMIS have been established on the analogy of formal EMISs. The seventh Joint Session of these committees, was held on 28-29th May 2024 at PIE for the consolidation of NFE data for the year 2022-23 of all NFE providers at federal/provincial levels. Hence the NFE data reported throughout this report has been extracted from NF-EMIS.

2.2.7. Public-Private Partnership

This report incorporates data on Public-Private Partnerships (PPPs) implemented by National and Provincial Education Foundations across Pakistan. The data provided by the National Education Foundation, Punjab Education Foundation, and Sindh Education Foundation is included. It's important to note that some PPP programs utilize education vouchers for students enrolled in private schools. The data cleaning process focuses on avoiding double counting.

2.2.8. Technical & Vocational Education and Training

The National Vocational and Technical Training Commission (NAVTTC) manages the National Skills Information System (NSIS) which contains the data of Technical and Vocational Education and Training (TVET) across the country. The NSIS is the national repository of skilled youth connected with provincial TEVTAs. The actual data on the TVET sector provided by NAVTTC is part of the report.

2.2.9. Deeni Madaris (Religious Institutes)

Deeni madaris data is collected annually from Wafaqs (Islamic seminaries' associations) designated by the Ministry of Federal Education and Professional Training. The data follows a standardized template aligned with the national education program and level of classifications. Each Wafaq provides information on the number of registered Deeni Madaris, their student enrollment, and teaching staff. It's worth noting that many Wafaqs have implemented robust computer systems for data management and user-friendly web portals to serve students, teachers, and the public. However, this accessibility is currently limited to registered Madaris under each specific Wafaq.

The following Wafaqs provided actual data for the 2022-23 academic year:

- i. Al Jamia Al Ashrafia, Lahore
- ii. Ittehad Ul Madaris Al Islamia Pakistan, Karachi
- iii. Ittehad Ul Madaris Alarbia Pakistan Mardan
- iv. Jamia Al Rasheed, Karachi
- Jamia Dar Ul Aloom Karachi
- vi. Jamia Taleemat Islamia, Faisalabad
- vii. Kinz Ul Madaris
- viii. Majma Al Uloom Al Islamia, Karachi
- ix. Majma Al-Madaris Taleem Al Kitab Wal Hikma, Lahore
- Nizam Ul Madaris Pakistan, Lahore
- xi. Rabta Tul Madaris Al Islamia Pakistan, Lahore
- xii. Tanzeem Ul Madaris Ahle Sunnat Pakistan, Lahore
- xiii. Wafaq Ul Madaris Al Arbia, Multan
- xiv. Wafaq Ul Madaris Al Shia, Pakistan, Lahore
- xv. Wafaq Ul Madaris Jamia Salfia, Faisalabad
- Wifaq Ul Madaris Al Islamia Al Rizvia Pakistan, Lahore

2.2.10. Special Education

The education data of the Special Education Directorates/Departments operating at federal/provincial is also collected by PIE for incorporation in the Pakistan Education Statistics Report. For the year, 2022-23, the public sector data provided by the following departments has been included in the report:

Directorate General of Special Education, Islamabad

- Special Education Department, Punjab
- Social Welfare Department, KP
- Social Welfare Department, Balochistan
- Directorate of Special Education, AJK
- Social Welfare Department, GB

2.2.11. Population Projections

Population data holds importance not only in the computation of indicators but also in analyzing the population growth patterns across the country. The Pakistan Bureau of Statistics (PBS) is the official source for providing population census data, while the National Institute of Population Studies (NIPS) provides the population projections for intercensal years. Both, the PBS and NIPS, are restricted by the Government of Pakistan to provide population data of ICT and four provinces (Punjab, Sindh, Khyber-Pakhtunkhwa, Balochistan) only. Gilgit-Baltistan and AJ&K population data are not available therefore population-related indicators are not computed for these regions and the National level population related indicators exclude data from these two regions. Therefore, the population-based education indicators presented throughout this report are computed for national, four provinces, and ICT levels only. For the computation of population-related indicators or other demographic analysis, the population projections for the year, 2022 provided by NIPS based on the population census 2017, have been used.

2.2.12. Regional Comparison

Pakistan, being a member state of the United Nations, provides country level education data/statistics to the UNESCO Institute for Statistics on a yearly basis which becomes part of the UIS global education database and is subsequently published in various global reports including UNESCO Global Education Monitoring (GEM) Report. The regional comparison presented in this report is based on the data published in UNESCO GEM report 2022/23 and from the UIS global database.

2.3. Data Analysis

The extensive snapshot of the education sector presented in the Pakistan Education Statistics report is based on various education indicators. Some of these indicators are part of the Thematic Indicators Framework for Sustainable Development Goal-4 while others are policy relevant indicators continued from Education For All (EFA) policy document. The standardized meta-data, as presented below, defined for each of the indicators is utilized to compute education indicators.

SDG-4 Thematic Indicators reported in PES 2022-23

#	SDG-4 Code	Indicator
1	(*)	Government expenditure on education as a percentage of GDP
2	1.a.2(*)	Proportion of total government spending on essential services (education)
3	4.1.2	Completion rate (primary education, lower secondary education, upper secondary education)
4	4.1.3	Gross intake ratio to the last grade (primary education, lower secondary education)
5	4.1.4	Out-of-school rate (1 year before primary, primary education, lower secondary education, upper secondary education)
6	4.1.5	Percentage of children over-age for grade (primary education, lower secondary education)
7	4.2.2	Participation rate in organized learning (one year before the official primary entry age), by sex
8	4.2.3	Percentage of children under 5 years experiencing positive and stimulating home learning environments
9	4.4.3	Youth/adult educational attainment rates by age group and level of education
10	4.6.2	Youth/Adult literacy rate
11	-	Net Enrolment Rate Total (NERT)

SDG (*) - Government expenditure on education as a percentage of GDP

Definition

Government expenditure on education (current and capital) expressed as a percentage of the Gross Domestic Product (GDP) in a given financial year.

Calculation method

Government expenditure on education in a given financial year expressed as percentage of the GDP for the same financial year.

$$XGDP_FSGOV_t = \frac{PXE_t}{GDP_t}$$

Where:

XGDP_FSGOV.= Government expenditure on education as a percentage of GDP in financial year t

PXE .= Total government expenditure on education in financial year t

GDP, = Gross domestic product in financial year t

2. SDG 1.a.2 - Proportion of total government spending on essential services (education, health and social protection)

Definition

Total general (local, regional and central) government expenditure on education (current, capital, and transfers), expressed as a percentage of total general government expenditure on all sectors (including health, education, social services, etc.). It includes expenditures funded by transfers from international sources to the government.

Calculation method

Total government expenditure for all levels of education combined expressed as a percentage of total general government expenditure (all sectors).

$$PXE_{t} = \frac{XE_{t}}{TPX_{t}}$$

Where:

PXE_s = Total general government expenditure on education (all levels of education combined) as a percentage of total government expenditure in financial year **t**

XE, = Total general government expenditure on education (all levels of education combined) in financial year t

TPX, = Total government expenditure in financial year t

3. SDG 4.1.2 - Completion rate (primary education, lower secondary education, upper secondary education)

Definition

The percentage of a cohort of children or young people aged 3-5 years above the intended age for the previous grade of each level of education who have completed that grade.

Calculation method

The number of persons in the relevant age group who have completed the previous grade of the given level of education is expressed as a percentage of the total population (in the survey sample) of the same age group. As with attendance rates, individuals are assigned completion age group based on the actual or assumed age at the beginning of the school year.

$$CR_n = \frac{EAP_{n, AG (a+3t5)}}{PAG_{(a+3t5)}}$$

Where:

Cr. = completion rate for level n of education

EAP, AG (a+3t5) = population aged 3 to 5 years above the official entrance age a into the last grade of level n of education who completed level n

PAG (a+3t5) = population aged 3 to 5 years above the official entrance age \mathbf{a} into the last grade of level \mathbf{n} of education

SDG 4.1.3 - Gross intake ratio to the last grade (primary, middle)

The number of new entrants in the last grade of the given level of education, regardless of age, is expressed as a percentage of the population of the intended entrance age to the previous grade of that level of education.

$$GIRLG_n = \frac{NE_{l,n}}{P_{n,a}}$$

Where:

GIRLG, = gross intake ratio to the last grade I of level n of education

NE, = new entrants to the last grade I of level n of education

 $P_{n,a}$ = population of the intended entrance age a to the last grade of level n of education

n = 1 (primary) or 2 (middle)

Note: If data on new entrants are not collected directly, they can be calculated by subtracting the number of pupils repeating the last grade from total enrolment in the last grade.

SDG 4.1.4 - Out-of-school rate (1 year before primary, primary education, lower secondary education, upper secondary education)

Definition

The proportion of children and young people in the official age range for the given level of education who are not enrolled in pre-primary, primary, secondary or higher levels of education.

Calculation method

The number of students of the official age for the given level of education enrolled in preprimary, primary, secondary or higher levels of education is subtracted from the total population of the same age. The result is expressed as a percentage of the population of the official age for the respective level of education. For primary, lower secondary and upper secondary education, the official age groups for the respective level of education are used in the indicator calculation. For pre-primary education, the indicator is calculated for children aged one year before the official age of entry into primary education.

$$OSR_n = \frac{SAP_n - \sum_{i=0}^{n} E_{i,AGn}}{SAP_n}$$

Where:

OSR_n = out-of-school rate for children and young people of the official age for level **n** of Education SAP_n = population of the official age for level **n** of education

 $E_{i,AGn}$ = enrolment in ISCED level i of children and young people of the official age for level n of education

SDG 4.1.5 - Percentage of children over-age for grade (primary education, lower secondary education)

Definition

Percentage of pupils in each level of education (primary and lower secondary general education) who are at least 2 years above the intended age for their grade.

Calculation method

The indicator measures progress towards ensuring all girls and boys complete a full cycle of quality primary and lower secondary education and achieve at least minimum levels of proficiency in reading and mathematics at each level. Children may be over-age for a grade because they started school late and/or they have repeated one or more previous grades.

The percentage of pupils in primary education who are at least 2 years above the intended age for their grade.

$$POAG_1 = \frac{\sum_{g=1}^{d} E_{1,g,AG(2+)}}{E_1} * 100$$

Where:

POAG, = Percentage of children over-age for grade

 $E_{t,g,AG(2x)} - \text{enrolment in grade } g \text{ who are aged at least 2 years older than the intended age for that grade}$

E, = total enrolment in primary education (all grades combined)

d = duration of primary education

7. SDG 4.2.2 - Participation Rate in Organized Learning one year before primary

Definition

The percentage of children aged one year before the official primary entry age, who participate in one or more organized learning program, including programs which offer a combination of education and care.

$$PROL_{0t1,AG(a-1)} = \frac{E_{0t1,AG(a-1)}}{SAP_{AG(a-1)}} *100$$

Where:

PROL $_{\text{ort,AGID-1}}$ = Participation rate in organized learning one year before the official primary entry age **a** $E_{\text{ort,AGID-1}}$ = enrolment in early childhood or primary education aged one year below the official entry age **a** to primary education

SAP_{AG(=1)} = population aged one year below the official entry age a to primary education

8. SDG 4.2.3 - Percentage of children under 5 years experiencing positive and stimulating home learning environments

Definition

Percentage of children aged 36-59 months who live in households where their mothers, fathers or other adult household members engage with them in the following types of activities: reading or looking at picture books; telling stories; singing songs; taking children outside the home; playing; and naming, counting and/or drawing.

Calculation method

The indicator is calculated as the percentage of children aged 36-59 months participating in activities in the areas being measured.

$$PCPSH_{3d} = \frac{CPSH_{3d}}{P_{3d}}$$

Where:

PCPSH_{3M} = percentage of children aged 36-59 months experiencing positive and stimulating home learning environments

CPSH₃₆₄ = children aged 3-4 years experiencing positive and stimulating home learning environments P₃₆₄ = population aged 3-4 years

SDG 4.4.3 - Youth/adult educational attainment rates by age group and level of education

Definition

Distribution of the population aged 25 years and above according to the highest level of education attained or completed. This indicator is usually presented for age groups of at least 25 years and older to ensure that the majority of the population has completed their education. Younger age groups are often still enrolled in the education system. The indicator can be calculated for youth (15-24 years) if desired.

Calculation method

Divide the number of persons aged 25 years and above with respect to the highest level of education attained by the total population of the same age group and multiply the result by 100.

$$EA^{t}_{AG_{i},n} = \frac{EAP^{t}_{AG_{i},n}}{P^{t}_{AG_{i}}}$$

Where:

EA' age = percentage of population in age group I that attained educational level n, in year t

EAP' __population in age group i that attained educational level n, in year t

P' = population in age group i, in year t

10. SDG 4.6.2 - Youth/adult literacy rate

Definition

The youth literacy rate is defined by the percentage of the population aged 15 to 24 years, who can read and write. It is typically measured according to the ability to comprehend a short simple statement on everyday life. Generally, literacy also encompasses numeracy, and measurement may incorporate a simple assessment of arithmetic ability. The literacy rate and number of literates should be distinguished from functional literacy, a more comprehensive measure of literacy assessed on a continuum in which multiple proficiency levels can be determined.

Calculation method

Percentage of the number of literate persons out of the total number of persons in the same age group, excluding persons with unknown literacy status.

$$LR_{AG_i}$$
 $\frac{LP_{AG_i}}{P_{AG_i}}$

Where:

LR_{AG} = literacy rate of population in age group i.

LP_{AGI} = literate population in age group i.

PAGE population in age group i, excluding persons with unknown literacy status.

 \hat{l} = 15 to 24 years old (youth), 15 years and older (adults).

11. SDG4 - Net Enrolment Rate Total (NERT)

Definition

NERT is used to measure the actual school participation of official school-age population for the given level of education. The total net enrolment rate is complementary to 100% of the corresponding out-of-school rate. Hence, the lower the total net enrolment rate, the higher the equivalent rate of out-of-school, and the greater the need to focus on improving access to education.

The total number of students in the official school age range for the given level of education who are enrolled in any level of education is expressed as percentage of the population of the same age group for the given level of education.

$$NERT_{n,t} = \frac{E_{n,t}^a}{P_{n,t}^a}$$

Where:

NERT ... = Total net enrolment rate at level n of education in academic year t

 $\mathbf{E}_{a,t}^{*}$ = Enrolment in any level of education of the population of the official age group \mathbf{a} for level \mathbf{n} of education in academic year \mathbf{t}

 $P_{a,t}^*$ = population in age group **a** which officially corresponds to the level **n** of education in academic year **t**

n = level of education

List of Other Education Indicators reported in PES 2022-23

#	Indicator
1	Gross Enrolment Ratio (GER)
2	Effective Transition Raten (ETR)
3	Survival Rate to Grade-5
4	Pupil-Teacher Ratio (PTR)
5	Schools with basic facilities
6	Transition rate from primary to lower secondary
7	Net Enrolment Rate Adjusted one year before primary
8	Pupil-Classroom Ratio
9	Teacher School Ratio
10	Pupil-School Ratio
11	Gross Intake Ratio in Primary Education

1. Gross Enrolment Ratio

Total enrolment in a specific level of education, regardless of age, expressed as a percentage of the eligible official school-age population corresponding to the same level of education in a given school year.

$$GER_h^t = \frac{E_h^t}{P_{h,a}^t} * 100$$

Where:

GER', - Gross enrolment ration at level of education h in school year t

E' = Enrolment at the level of education h in school year t

P'_{*} = population in age group **a** which officially corresponds to the level of education **h** in school year **t**

Example: If the entrance age for primary education is 7 years with a duration of 6 years then a is (7-12) years

2. Effective Transition Rate

Number of new entrants to the first grade of the higher level of education in the following year expressed as a percentage of the students enrolled in the previous grade of the given level of education in the given year who do not repeat that grade the following year.

$$ETranR_{a,b+1}^{i} = \frac{NE_{a+1,01}^{vi}}{E_{a,0a}^{i} - R_{a,0a}^{vi}} * 100 = \frac{E_{a+1,01}^{i+1} - R_{a+1,0a}^{i+1}}{E_{a,0a}^{i} - R_{a,0a}^{i+1}}$$

ETranR'	Effective transition rate from cycle or level of education h to the next level h+/ in school year r
$NE_{^{h+1,G1}}^{\ast 1}$	Number of new entrants to the first grade GI at level of education $h+I$ in school year $r+I$
E **1 Gt	Number of pupils enrolled in the first grade GI at level of education $h+I$ in school year $i+I$
$R^{t+1}_{j_{t+1},\;Gs}$	Number of pupils repeating the first grade GI at level of education $h+I$ in school year $t+I$
$E_{\text{A.Oe}}^{\text{t}}$	Number of pupils enrolled in the last grade ${\it Gn}$ at level of education ${\it Ir}$ in school year t
$\mathbf{R}_{h, \text{Gis}}^{t+1}$	Number of pupils repeating the last grade Gn at level of education Ir in school year $r+1$

3. Survival Rate to Grade-5

Percentage of a cohort of pupils (or students) enrolled in the first grade of a given level or cycle of education in a given school year who are expected to reach successive grades.

Divide the total number of pupils belonging to a school-cohort who reached each successive grade of the specified level of education by the number of pupils in the school-cohort i.e. those originally enrolled in the first grade of primary education, and multiply the result by 100. The survival rate is calculated on the basis of the reconstructed cohort method, which uses data on enrolment and repeaters for two consecutive years.

$$SR_{g,i}^{k} = \frac{\sum_{i=1}^{m}P_{g,i}^{i}}{E_{g}^{k}} * 100 \quad \text{where} \quad P_{g,i}^{t} = E_{g,i+j}^{t+1} - R_{g,i+j}^{t+1}$$

$SR_{g,i}^k$	Survival Rate of pupil-cohort g at grade ℓ for a reference year k
E_g^k	Total number of pupils belonging to a cohort g at a reference year k
$\mathbf{P}_{\mathbf{g},i}^{t}$	Promotes from \mathbb{R}^k who would join successive grades i throughout successive years i
\mathbf{R}_{t}^{t}	Number of pupils repeating grade i in school year t
Ŧ	grade (1, 2, 3,, n)
t	year (1, 2, 3,, m)
g	pupit-cohort

4. Pupil-Teacher Ratio

Average number of pupils per teacher at each level of education (pre-primary, primary, lower and upper secondary education) in a given academic year.

$$PTR_n = E_n / T_n$$

Where:

PTR = Pupil-teacher ratio at level n of education

E, = enrolment in level n of education

T = teachers at level n of education

n: 02 (pre-primary), 1 (primary), 2 (lower secondary), 3 (upper secondary) and 23 (total secondary)

5. Schools with basic facilities

Percent of schools by level of education with each specified infrastructure or service.

$$PS_{1,f} = \frac{S_{1,f}}{S_1} *100$$

Where:

PSR_u = Percentage of schools in primary education with access to facility f

S_u = schools in primary education with access to facility f

S,= total number of schools in primary education

6. Transition Rate from Primary to Lower Secondary

The transition rate is the proportion of students that progress from the final grade of one level to the first grade of the next level, expressed as a percentage of those enrolled in the final grade of the preceding school year. It indicates the degree of access to the next higher level, measuring the upward mobility in the educational hierarchy. Viewed from the lower cycle or level of education, it is considered as an output indicator. Viewed from the higher educational cycle or level, it is considered as an indicator of access.

$$TR_{h,h+l}^{t} = \frac{E_{h+l,l}^{t+l} - R_{h+l,l}^{t+l}}{E_{h,n}^{t}} * 100$$

Where:

TR = Transition rate (from cycle or level of education h to h+1 in school t)

E" - Number of pupils enrolled in the first grade at level of education h+1 in school year t+1

R", but = Number of pupils repeating the first grade at level of education h+1 in school year t+1

EL = Number of pupils enrolled in final grade n at level of education h in school year t

7. Net Enrolment Rate Adjusted one year before primary

Total enrolment of children aged one year before primary who are enrolled in the primary, pre-primary and secondary level as % of official pre-primary age population.

Total enrolment of children aged one year before primary who are enrolled in primary, pre-primary and secondary level

Total number of official pre-primary age population

8. Pupil-Classroom Ratio

Calculated by dividing the number of students enrolled in a level by the number of class room.

9. Teacher-School Ratio

The Teacher-to-School ratio is equal to the number of teachers in all schools divided by total number of schools.

10. Pupil-School Ratio

The Pupil-to-School ratio is equal to the number of pupils in all schools divided by the total number of schools.

11. Gross Intake Ratio in Primary Education

Total number of new entrants in the first grade of primary education, regardless of age, expressed as a percentage of the population at the official primary school-entrance age. The Gross Intake Rate (GIR) reflects the general level of access to primary education. This indicator provides only a rough measure of access to the first grade since it also considers the number of over-aged and under-aged new entrants to Grade 1. It also indicates the capacity of the education system to provide access to Grade 1 education for the official school-entrance age population. This indicator is used as a substitute for Net Intake Rate (NIR) in the absence of data on new entrants by single years of

$$GIRPri_{t} = \frac{\textit{Number of new entrants to Grade 1 (all ages) in school-year t}}{\textit{Population of the official primary school-entrance age in school-year t}} x 100$$

CHAPTER 3

EDUCATION SYSTEM IN PAKISTAN

Highlights

Pakistan has a vast education system consisting of 349,909 educational institutions. The system serves 56,069,332 enrolled students and employs a teaching workforce of 2,573,993 in the year 2022-23.

The education system expanded by 12% in number of institutions, 3% in enrolment and 19% in teaching strength from the previous year.

Public sector institutions educate 54% of students (29,997,358), while private sector institutions serve 46% (26,071,974). Teaching personnel in public sector institutions account for 39% (995,643) of the total, while the private sector employs 61% (1,578,350) of teachers.

Over a five years, the number of educational institutions remained relatively stable but enrollment consistently grew reaching 56,069,332 in 2022-23, and the teaching workforce has also increased steadily from 2,093,311 to 2,573,993.

Out of a total of 150,689 public sector schools, 78% (117,466) operate at the primary level followed by 16,087 middle and 14,713 high schools possessing 10.7% and 9.8% share respectively. Only 1.6% (2,423) of public schools are higher secondary.

Private sector primary schools have a larger share of enrollment than public sector primary schools, despite public sector schools being more numerous.

Pakistan has 136,687 primary schools, with the majority (86%) in the public sector. Despite fewer schools, the private sector holds a significant share of primary enrollment, with 39% of students.

Of a total of 117,466 public sector primary schools, 26,643 (23%) have a single teacher. Furthermore, 24% of primary schools, totaling 27,938, have two teachers.

Public middle schools have a higher enrollment in rural areas (59%).

Public sector schools employ a substantial number of teachers 72% at primary level. Private schools generally have a higher percentage of female teachers, particularly at the primary and secondary levels.

There are 4,505 intermediate and degree colleges in Pakistan, where 57% are public colleges while 43% are private.

There is a significant gender disparity in TVET, with male students comprising 67% (302,719) of total enrolment, and male teachers making up 88% (35,804) of the total teaching workforce.

Public institutions dominate NFBE, with 94% (1,006,520) of total enrolment (1,073,704) and about 93% (31,144) of total teachers (33,570).

Approximately 3% (10,382) schools operate under public-private partnerships, with a cumulative enrolment of 3,510,594 students, 46% (1,611,250) of whom are female.

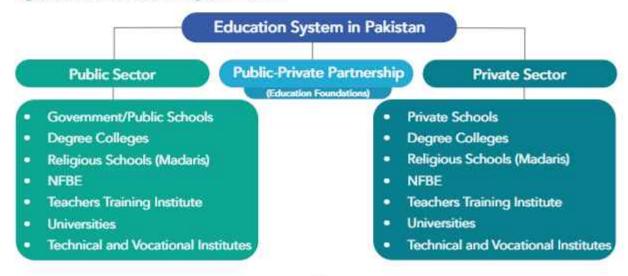

There are 64,417 religious' schools (Deeni Madaris) in Pakistan, all managed by the private sector.

Pakistan has 247 universities and higher education institutions, with 40% (100) being privately managed. Total enrolment in tertiary education is 1,936,329 with females constituting 46% (886,595) of the total.

The education system of Pakistan is spread over several levels of education characterized by compulsory education for 5-16 years old population segment. Pre-Primary or Early Childhood Education consists of two years duration for the age 3-4 years however it is not part of the basic education. Primary education spans over five years for the age group 5-9 belongs theoretically to this level. Middle education comprises grades 6-8 beginning at the age of 10 years. Combined, primary and middle education are also termed elementary education. The length of high (grades 9-10) and higher secondary (grades 11-12) level is two years with entrance ages of 13 and 15 years. High and Higher secondary levels collectively form secondary education. Notable post-secondary education streams include college education, technical education, and tertiary education.

The education services are provided by a variety of operators. Public sector formal education services are the responsibility of the education ministry at federal level and education departments at provincial level. Some government organizations, both at the federal and provinces, are operating education institutions hence termed as other-public sector. The private sector schools include those operated by CSOs, NGOs, INGOs, individuals, Madaris, etc. Non-Formal education (focusing primarily on over-age or out of school children) and public-private partnership modes of education are operational side by side with public sector education.

Figure 2 : Structure of Education System in Pakistan

The education system of Pakistan spans over 349,909 educational institutions catering to the learning needs of 56,069,332 enrolled students with a deployed teaching workforce of 2,573,993 during the year 2022-23. The system expanded by 12% in institutions, 3% in enrolment and 19% in teaching strength from the previous year. The overall increase in enrolment and the number of institutions is primarily driven by the private sector, which is expanding both in terms of institutions and enrolment. The public sector has also experienced an increase in institutions, enrolment, and the number of teachers but the growth is comparatively low from private sector.

Comparing the education statistics of 2021-22 and 2022-23, the number of public sector institutions increased from 176,195 to 185,803. The enrollment in public sector institutions went from 29,359,376 to 29,997,358. The number of teachers in public sector institutions also increased from 889,815 to 995,643. The number of private sector institutions increased significantly from 137,250 to 164,106 indicating substantial growth. The number of students enrolled in institutions in the private sector also climbed from 25,511,588 to 26,071,974 demonstrating a noticeable rise in enrollment. As the teaching workforce expanded, the number of teachers at private sector institutions rose from 1,249,676 to 1,578,350.

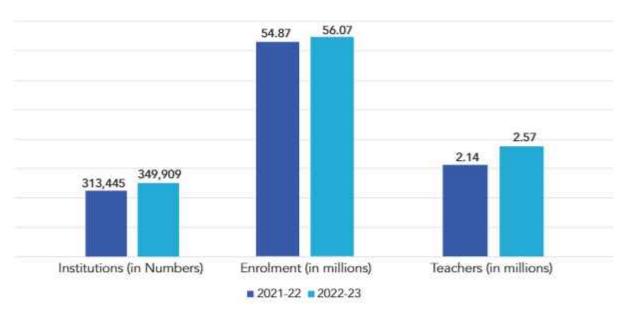

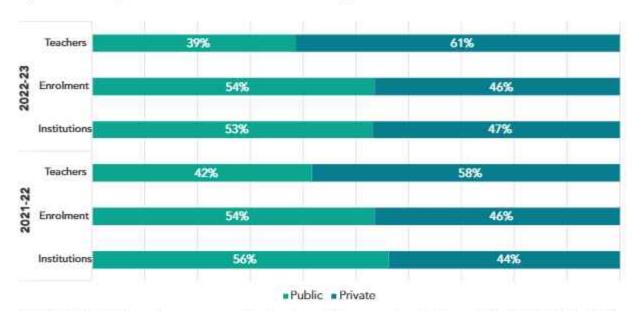

Figure 3: Number of Institutions, Enrolment and Teachers - 2021-22 & 2022-23

Among the institutions, 185,803 are operated by the public sector while 164,106 are privately managed. From Pre-Primary to Degree Level 65,683 institutions are for females while 97,509 are for males and the remaining 74,118 institutions are coeducation. As compared to 2021-22, the share of public sector institutions decreased from 56% to 53% but the share of enrolment remained the same. The teaching strength in the private sector rose from 58% in 2021-22 to 61% in 2022-23.

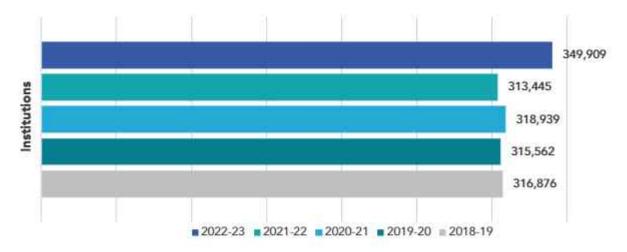

Figure 4: Percentage of Institutions, Enrolment and Teachers by Sector - 2021-22 & 2022-23

29,997,358 (54%) students are enrolled in the public sector institutions while 26,071,974 (46%) students are acquiring education from the private sector institutions. 995,643 (39%) teachers are deployed in public sector institutions whereas 1,578,350 (61%) teachers are imparting education in privately managed institutions.

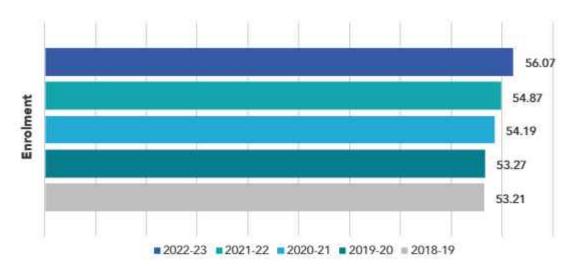

The number of educational institutions has shown a relatively stable trend up to 2021-22, with minor fluctuations. It increased from 316,876 in 2018-19 to 349,909 in 2022-23.

Figure 5: Number of Educational Institutions - 2018-19 to 2022-23

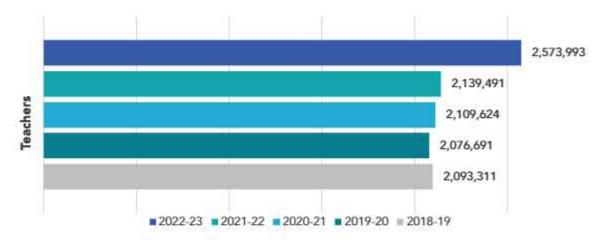

The data shows a consistent pattern of growth in enrolment over the five-year period with the total enrolment growing from 53,214,058 in 2018-19 to 56,069,332 in 2022-23. While the growth rates vary from year to year, the overall trend is positive, indicating an increasing number of students participating in the education system.

Figure 6: Enrolment in Educational Institutions (in millions) - 2018-19 to 2022-23

Over five years, there has been a gradual increase in the number of teachers from 2018-19 to 2021-22, with the total number of teachers growing from 2,093,311 in 2018-19 to 2,573,993 in 2022-23. This indicates a positive trend in terms of the number of teachers joining the education sector. The overall trend is characterized by an increase in the teaching workforce.

Figure 7: Number of Teachers in Educational Institutions - 2018-19 to 2022-23

3.1 School Education

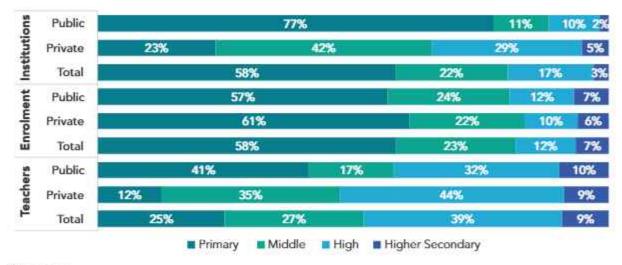

School Education spans from Pre-primary to higher secondary education. Almost 3 out of every 4 schools (117,817 out of 152,267) in the public sector school education are operating at the primary level which reduces massively to 11% (16,403) and 10% (15,271) at middle and high schools respectively. Only 2% (2,762) of the public schools are higher secondary. On the contrary, 23% (18,870) schools are working at the primary level while a larger chunk of schools i.e. 43% (34,630) are operational at middle education level in the private sector. A sizeable number (29%) of institutions are imparting education services at the secondary level of education whereas 5% (4,310) are functional at higher secondary level of education in private sector.

The comparative analysis of enrolment catered by public and private sectors reveals the narrow difference in share of enrolment at each level of education. The largest difference is at primary education where the private sector accommodates 8,134,742 (39%) as compared to

12,511,084 (61%) in public sector proportionately to total enrolment in each sector.

A large number of public sector teachers are working in primary education (41%) followed by secondary education (33%) whereas the private sector deployed the highest number of teachers in secondary education level (40%) followed by middle education (37%).

Figure 8: Percentage Share of Institutions, Enrolment and Teachers in School Education - 2022-23

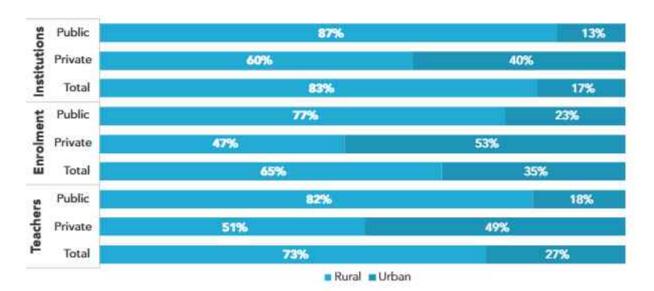

Primary

As many as 136,687 primary schools are operating across Pakistan which constitutes 58% of formal school education component. The public sector is managing 117,817 (86%) institutions while 18,870 (14%) of institutions are providing education services in the private sector. A major portion (83%) of the primary schools operate in rural areas.

Despite a comparatively low share of primary schools, the private sector holds larger chunk of enrolment in primary education. Majority of the students are enrolled in public sector which is accommodating 12,511,084 (61%) students. The enrolment catered by the primary stage in private sector consists of 8,134,742 (39%) enrolments with female share of 3,612,447 (44%).

Figure 9: Distribution of Institutions, Enrolment and Teachers in Primary by Location - 2022-23

There are significant gender disparities between public and private educational institutions. Public institutions have a higher representation of males among both students and teachers, while private institutions are mostly female dominated in teachers. In public educational institutions, 73,463 (62%) are declared as male compared to 44,094 (37%) females. Private educational institutions show a contrasting pattern where 94% (17,009 out of 18,004) schools are coeducation. In terms of enrollment in the public sector, boys with enrolment of 6,681,036 (53%) slightly outnumber girls with enrolment of 5,830,048 (47%). Among those enrolled in the private sector, boys' enrolment is 4,522,295 (56%) and girls' enrolment is 3,612,447 (44%). Within public educational institutions, male teachers constitute a slight majority, comprising 57% (190,597), while female teachers represent 43% (144,612). In contrast, private educational institutions exhibit a notable female majority among teachers, accounting for 83% (109,442), with male teachers making up 17% (22,423) of the total teaching staff.

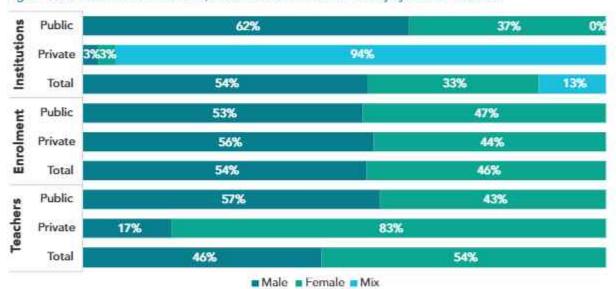

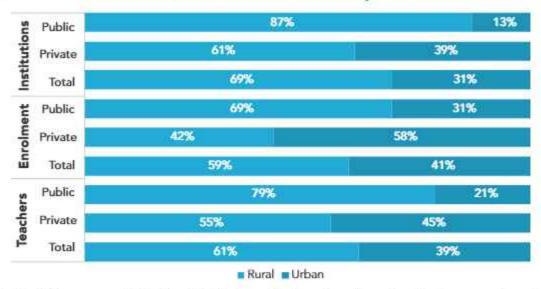

Figure 10: Distribution of Institutions, Enrolment and Teachers in Primary by Gender - 2022-23

Total 469,013 teaching workforce is deployed in primary institutions where 213,020 (46%) are male and 254,054 (54%) are female. 337,148 (72%) teachers perform their duties in the public sector while 131,865 (28%) are teaching in the private sector. Percentage of female teachers in public sector is 43% as compared to private sector 83%. 23% of public sector primary schools are operating with single teacher only while 2 teachers are deployed in 24% of public sector primary schools. There exist only 12% primary schools in public sector having 5 or more than 5 teachers.

Middle

Middle school education, the terminal level of elementary education, consists of 51,033 institutions throughout Pakistan. 16,403 and 34,630 institutions are operating in public and private sectors respectively while 69% are operating in rural areas. The availability of middle to primary schools is 1:2.68 which means that, on average, a single middle school is available against 2.68 primary schools. The share of middle schools in overall formal school education is 22%. Private institutions have a significantly larger share in terms of institutions and enrollment compared to public institutions. This trend is also reflected in the distribution of teachers.

Figure 11: Distribution of Institutions, Enrolment and Teachers in Middle by Location - 2022-23

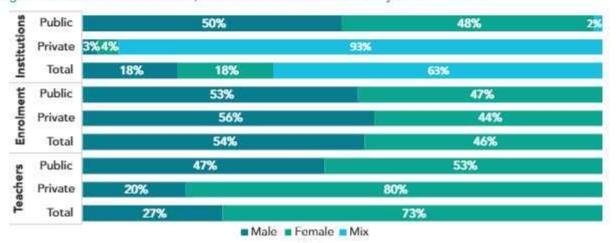

Notable differences exist in the distribution of educational services between rural and urban areas, with public institutions and enrollment being more prominent in the rural areas, while private institutions and enrollment are more prevalent in the urban areas.

The enrolled students at middle stage of education are 8,282,131 of which 3,792,345 are female. The percentage of female enrolment at middle stage is 46%. The situation of enrolment at middle stage is similar to primary education in both urban and rural areas where public sector the leading education service provider with a portion of 58% and 83% respectively. Public enrollment of 3,640,942 in rural areas constitutes 69% of total rural enrolment. Private enrollment is significantly higher in urban areas (58%) compared to rural areas (31%).

A teaching strength of 511,205 exists in middle schools. The gender distribution of teachers is 137,779 male and 372,750 of female. Similar to educational institutions, 27% (135,845) teachers are working in public sector schools while the share of private sector is 73% (375,360). Public school teachers are predominantly located in rural areas (79%) compared to urban areas (21%) counting 106,963 and 28,882 respectively. Private school teachers are more evenly distributed between rural (55%) and urban (45%) areas counting 167,976 and 27,384. The availability of teachers in public middle schools is comparatively better than primary education as 78% of schools (12,488 out of 16,087) have five or more teachers.

Figure 12: Distribution of Institutions, Enrolment and Teachers in Middle by Gender - 2022-23

The gender distribution is almost equal in public sector institutions with males accounting for 50% and females comprising 48% remaining 2% being coeducation. In contrast, 93% of private educational institutions are coeducation at middle level. In public sector enrolment, males have a slight edge, constituting 53% of the student population, while females make up the remaining 47%. In private sector enrolment, there is a female majority representing 56% and males comprising 44%. Among teachers in public educational institutions, females account for 53%, while male teachers make up 47%. In private educational institutions, there is a substantial gender disparity, with females dominating the teaching workforce at 80%, leaving only 20% for male teachers.

High

A total of 39,389 secondary schools function across the country. 10,566 educational institutions facilitate males while 8,206 institutions serve the female population and the 20,286 are coeducation where as the remaining 331 institutions did not provide its gender. A large number of secondary schools exists in rural areas comprising 54% of total schools while only 46% of schools are operating in urban areas. The secondary schools hold 17% share of the total formal schools. The public sector manages 15,271 (39%) secondary schools while 24,118 (61%) schools are privately managed.

As many as 4,135,635 students are acquiring education at the secondary stage i.e. classes 9 and 10 out of which 2,298,723 are male and 1,836,912 are female. The female percentage of enrolment at this stage is 44%. Similar to lower levels of education, a large number of students i.e. 66% are part of public sector schools while the private sector bears the remaining chunk at this stage of education. Public enrollment is higher in rural areas (61%) compared to urban areas (39%). Private enrollment is significantly higher in urban areas (64%) compared to rural areas (36%).

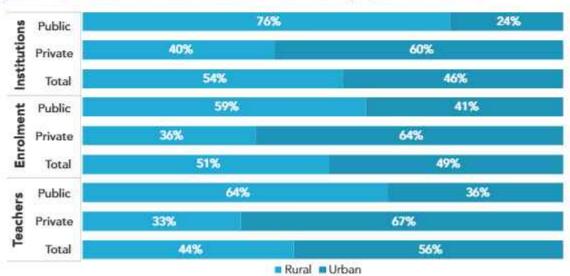

Figure 13: Distribution of Institutions, Enrolment and Teachers in High by Location - 2022-23

In public high schools, there is a higher representation of males, constituting 55% (8,466), compared to females at 42% (6,466). In the private sector, 9% (2,100) of institutions are male-only, 7% (1,740) are female-only, and a substantial 84% (19,947) are coeducational. Male enrollment in public high schools is 54% (1,497,830), surpassing female enrollment at 46% (1,257,021).

In private high schools, male students (800,893) constitute 58%, outnumbering their female counterparts at 42% (579,891). Among teachers in public high schools, there is a slight male majority at 53% (138,351) compared to 47% (124,273) female teachers. In private high schools, there exists a significant gender disparity among teachers, with females comprising 74% (348,707) of the workforce, and males representing only 26% (120,313).

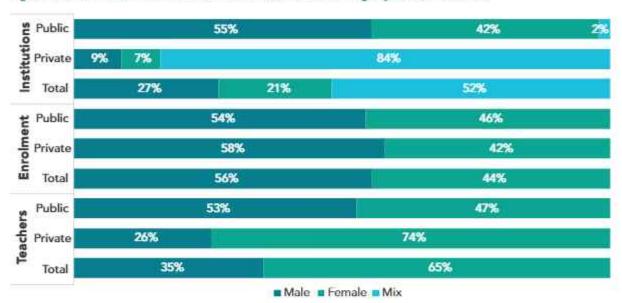

Figure 14: Distribution of Institutions, Enrolment and Teachers in High by Gender - 2022-23

264,347 teaching personnel are serving in the public sector secondary schools, whereas 469,020 are deputed in private sector secondary schools. The female teachers in public sector high schools are 47% however the share of female teachers in private sector secondary schools is 74%. 21,341 (54%) of high schools are mostly operating in the rural areas.

Higher Secondary

The higher secondary schools have a 3% share in the formal education system as 7,072 institutions at this level are operational throughout the country. 2,762 schools are providing education services in the public sector and 4,310 are functioning in the private sector. Total enrolment of classes 11 and 12 in higher secondary schools is 2,331,326 with 1,241,807 males and 1,089519 females which constitutes 5% of total enrolment of this stage. The public sector is catering 65% of students and the remaining 35% are enrolled in private sector.

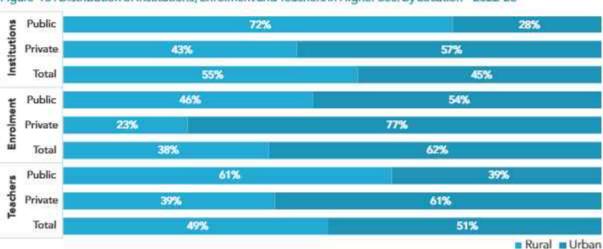

Figure 15: Distribution of Institutions, Enrolment and Teachers in Higher Sec. by Location - 2022-23

In public educational institutions, 54% are male and 39% female while a mixed-gender category accounts for 7%. Male institutions in the private sector make up 12%, females 13%, and a substantial mixed-gender representation of 75%. The public sector enrollment shows a slight predominance of males (52%) over females (48%). In private sector enrollment, there is also female majority (55%) compared to males (45%). Male teachers constitute 54% of the total teacher workforce at higher secondary level in contrast to female teachers (46%). Private educational institutions demonstrate a notable gender disparity among teachers, with females forming the majority at 62%, while males represent 38%.

Figure 16: Distribution of Institutions, Enrolment and Teachers in Higher Sec. by Gender - 2022-23

The data reveals that 174,254 teachers are imparting education in higher secondary schools out of which 79,955 (46%) are male and 93,345 (54%) are female. The gender bifurcation of 954 teachers belonging to ICT is not available. The public sector, similar to the previous year, arranges the services of 79,384 (46 %) teachers and the private sector is hosting 94,870 teachers (54%).

3.2 Intermediate and Degree Colleges

There are 4,505 intermediate and degree colleges functioning in the country, out of which 1,934 (43%) are public colleges and 2,571 are private. 629,999 students are currently enrolled in these colleges in classes 13 to 16. The females constitute the 54% share of the total enrolment at this stage. Out of a total of 82,570 teachers of intermediate and degree colleges, 45208 (45%) are working in the public sector. The female share of teaching strength is 46%.

3.3 Teacher Training Institutions

The public sector is the major service provider in teacher training institutions operating 73% of the institutions (158 out of 217). Only 59 (27%) of the institutions are managed by the private sector. The total enrolment in these institutions is 76,227 with 48,703 males and 27,524 females. The total enrolment in public sector teacher training institutions is 70,862 (93%) whereas the share of the private sector is only 7%. The total number of teachers in the teachers'

training institutions are 3,791 out of which 3,493(92%) are in public while (8%) are in the private sector.

3.4 Technical and Vocational Education and Training

In technical education, there are 1,213 institutions with a total enrollment of 100,069 students, and there are 27,275 teachers (26,094 male and 1,181 female). In vocational education, there are 3,193 institutions with a total enrollment of 353,888 students, and there are 13,614 teachers (9,710 male and 3,904 female). Combining both levels, there is a total of 4,406 institutions with 453,957 students and 40,889 teachers. Overall, across both levels, there are 35,804 male teachers and 5,085 female teachers. When considering both levels together, male students make up 67% of the total enrollment, while female students account for 33%. Across both levels, male teachers constitute 88% of the total, while female teachers make up merely 12%.

3.5 NFBE

Public institutions have a significantly higher number of institutions, enrolment, and teachers compared to private institutions. 94% of total enrolment is in public institutions, while only about 6% is in private institutions. In terms of teachers, around 93% are in public institutions, and 7% are in private institutions. These statistics highlight the dominance of public institutions in the non-formal education sector in terms of both enrolment and teacher presence, with a notable disparity between public and private institutions.

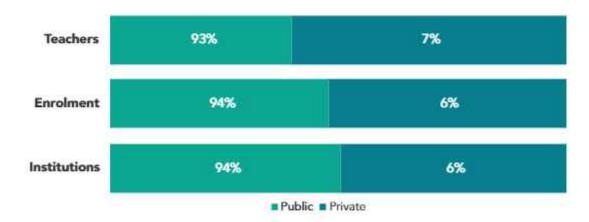

Figure 17: Distribution of Institutions, Enrolment and Teachers in NFE by Sector - 2022-23

3.6 Public-Private Partnership

The concept of public-private partnership education realized through the establishment of national and provincial education foundations has emerged as a successful model in the provision of education service delivery to the masses in Punjab, Sindh and ICT through Punjab Education Foundation, Sindh Education Foundation and National Education Foundation respectively. A variety of models ranging from opening of new schools by private sector to providing education vouchers are implemented. A huge number of schools, 10,382 are operating under public-private partnerships constituting 3% share of school education. The

education foundations have a cumulative enrolment of 3,510,594 with male and female percentages of 54% and 46% respectively. 126,474 number of teachers are deployed in the institutions under education foundations.

3.7 Deeni Madaris

The stream of religious education is contributing sizably to the education system by providing religious education through Deeni Madaris functioning in the country. In some areas, this stream of education is preferred by low-income families as they provide free education services along-with boarding and lodging facilities. A large number of Deeni Madaris are registered with respective Wafaq (a regulatory body of each sect notified/recognized by the Government) while some are maintaining their independent identity. All of these Wafaq and Madaris are managed by private sector.

There are 64,417 Deeni Madaris operating in the country registered with their respective Wafaqs. The highest number of Madaris are registered with Wafaq-ul-Madaris-al-Arabia wafaq while Al-Shia Wafaq has the lowest number of registered Madaris. These Madaris are catering to the education needs of 3,346,923 students out of which 2,048,903 are male and 1,298,020 (39%) are females. Regarding teaching strength, 297,394 teachers are deployed in these Madaris with a female share of only 11%.

3.8 Tertiary Education

There are 247 universities and higher education institutions operating in Pakistan as per data reported for the year 2021-22, out of which 100 universities are privately managed. The highest number of universities are in the Punjab province/area which is host to 88 universities/HEIs. Total enrolment in tertiary education is 1,936,329 with males 1,049,734 and females 886,595. Females constitute 46% of total tertiary enrolment. Out of total enrolment, 1,541,893 students are enrolled at Bachelors level.

CHAPTER 4

ACCESS TO EDUCATION AND PARTICIPATION

Highlights

Overall, 38% of children in Pakistan are out of school, with rates increasing as students progress through the education system. 10.86 million out-of-school children exist in the primary age group. This includes 5.06 million (35%) males and 5.80 million (42%) females.

The number of OOSC has decreased from 26.21 million to 26.09 million between 2021-22 and 2022-23. Gender disparities in OOSC are observed, with larger proportions percentages of out-of-school females at higher educational levels.

The Gross Intake Rate (GIR) for primary education shows that 91% of children, irrespective of their age, enter grade 1 of primary education. Islamabad Capital Territory leads with 137%, while Balochistan lags with 43%. Gender disparities in GIR are prevalent in Sindh, KP, and Balochistan.

The Gross Enrollment Ratio (GER) for pre-primary education is 76%, with gender disparities existing in all the provinces except for Punjab. KP and ICT have the highest participation rates in pre-primary education.

Only 33% of the population one year before primary is part of organized learning. ICT has the highest participation rate at 93%, while Balochistan has the lowest at 16%.

More than 60% of students in primary and middle education in Pakistan are overage, with the highest numbers in KP and Balochistan. Punjab has the lowest percentage of overage children.

ICT has the highest enrollment rate (87%) in the last grade of primary education, followed by Punjab (79%) and KP (70%). Male enrollment rates are slightly higher than female enrollment rates.

There are variations in GER across provinces, with Islamabad Capital Territory (ICT) having the highest GER in primary education and Sindh and Balochistan facing challenges. Gender disparities exist in primary and middle school enrollment, with males generally enrolling at higher rates than females.

ETR varies by region, with GB and ICT having the highest ETRs, while Balochistan has the lowest ETR for primary to middle transition.

The overall Survival Rate for Grade 5 in Pakistan is 80%, with ICT having the highest rate at 97%. Balochistan has the lowest survival rate among all regions at 52%. There are gender disparities in survival rates, with females often having higher rates than males in various provinces.

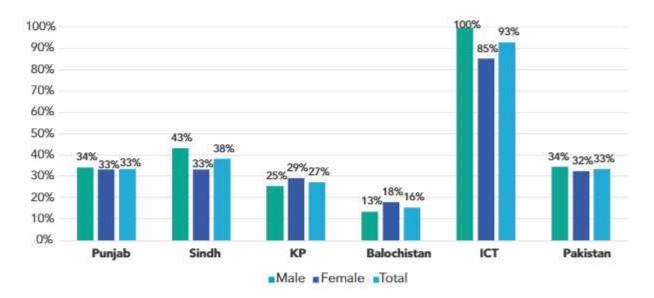

PTR varies across provinces, with Balochistan having the lowest PTR at the primary level, and ICT having the highest PTR across post-primary levels of education.

This chapter presents the education indicators of access to education and participation by level of education disaggregated by gender and province/area. Similar to its earlier edition, The Pakistan Education Statistics 2022-23 report excludes AJ&K and GB in the computation of population-related indicators due to the non-availability of population data. This limitation in data coverage should be considered when interpreting findings and utilizing the data.

4.1 Participation Rate in Organized Learning one year before primary

The participation rate in organized learning one year before primary varies across provinces in Pakistan, with ICT showing the highest overall rate of 93% participation rate followed by Sindh (38%) and Punjab (33%), respectively. Balochistan has the lowest participation rate (16%). The gender aspect of this indicator reveals that Sindh and ICT have the highest male-female participation gaps, indicating a more significant difference in boys' and girls' enrollment in organized learning programs one year before primary school. Punjab has a negligible gap of 1%. Balochistan and Khyber Pakhtunkhwa have a negative gap, indicating higher female participation rates than males.

Figure 18: Participation Rate in Organized Learning One Year Before Primary – 2022-23

4.2 Intake Rates

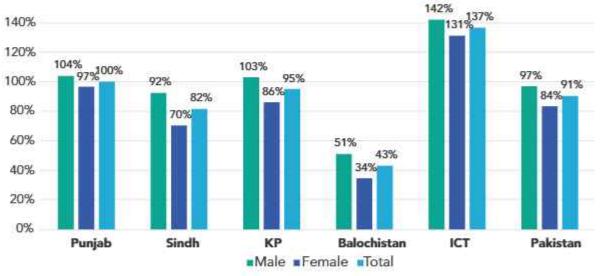

The stock of children entering primary education are normally measured through intake rates to the first grade. This indicator provides a measure of the system's capacity to make primary education accessible.

Gross Intake Ratio in Primary Education

The Gross Intake Ratio to the first grade of Primary Education in Pakistan is 91% with a gender break-down of 97% and 84% for males and females respectively. The provincial disaggregation shows ICT at the top with overall GIR at 137%. The GIR for Punjab, Sindh and Khyber-Pakhtunkhwa is above 80% indicating significant enrolment success whereas Balochistan has the lowest GIR at 43%. Sindh has a considerable gender gap with a GIR of 92% for males and 70% for females, showing a 22-percentage point difference. The gender gap for KP and Balochistan is 17 percentage points.

Figure 19: GIR in Primary Education by Province and Gender - 2022-23

Gross Intake to Last Grade of Primary and Middle

The Gross Intake from the last grade of Primary to the Middle level in Pakistan stands at 68% and 49% respectively. The highest Gross Intake Ratio to the last grade of Primary (87%) and to last grade of the Middle is seen in ICT at 87% and 84% respectively. With only 30% of children accessing the final grade of primary schooling and 19% advancing to the final grade of middle schooling, Balochistan has the lowest gross intake rates. The primary enrollment rates in Punjab and KP are comparatively high (79% and 70%, respectively), whereas the middle school enrollment rates are lower (56% and 51%, respectively). Sindh has a lower intake to the last grade of middle (40%) than to the last grade of primary (56%). Across all provinces, GIR to the last grade of middle is lower than to the last grade of primary highlighting a significant dropout between the primary and middle education.

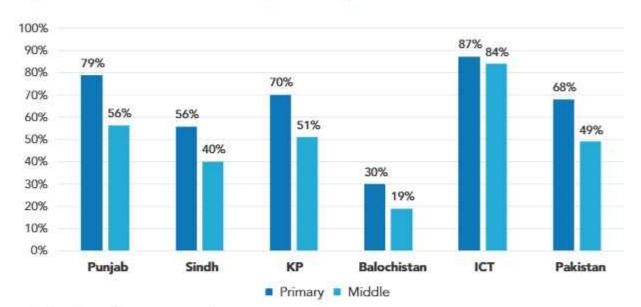

Figure 20: Gross Intake to Last Grade of Primary and Middle by Province - 2022-23

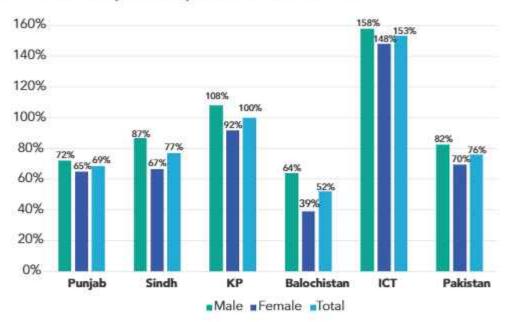

4.3 Enrolment Ratios

The gross enrollment ratio reveals the capacity of the educational system at each level. The GER aids in assessing how many children of primary school age have access to education and how many of these children are enrolled in school. A high ratio indicates that a higher percentage of the population is enrolled in school. This higher percentage of overage children may be the result of GER surpassing 100%. GER supports educational authorities in resource allocation, educational planning, etc.

Gross Enrolment Ratio in Pre-Primary

Pakistan has a Gross Enrollment Ratio (GER) of 76% in pre-primary education for the year 2022-23. ICT has the greatest GER at 153%, with KP coming in second at 100%. GER for Punjab is 69% and for Sindh is 77%. Balochistan has the lowest GER of 52% with the highest gender disparity (64% for men versus 39% for women). There is a 20-percentage point difference in Sindh (87% for men and 67% for women). Gender disparity is also huge in KP where female GER is 92% and male is 108%.

Figure 21: GER in Pre-Primary Education by Province and Gender - 2022-23

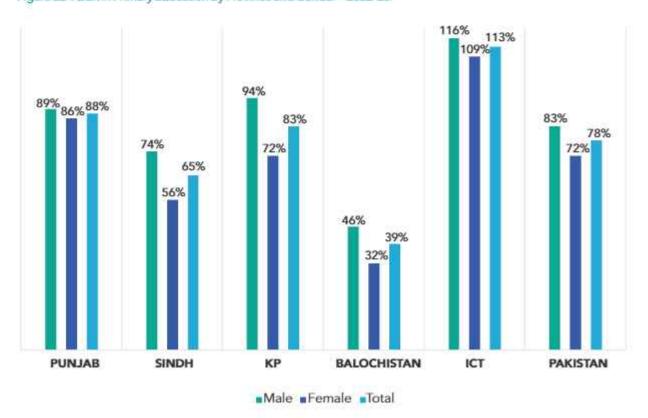

Gross Enrolment Ratio in Primary

The GER of Pakistan is 78%, with 83% males and 72% females. Punjab shows a GER of 89% for males and 86% for females, achieving an overall GER of 88%. Sindh has a total GER of 65%, with a notable gender gap of 18 percentage points (74% for males and 56% for females).

KP exhibits a GER of 83% with a gender breakup of 94% and 72% for males and females respectively. Balochistan faces the lowest GER with 46% for males and 32% for females, resulting in an overall GER of 39%. ICT stands out with the highest GER of 113% and a relatively small gender gap of 7 percentage points (116% for males and 109% for females).

Figure 22: GER in Primary Education by Province and Gender-2022-23.

Gross Enrolment Ratio in Middle

GER in middle education at the national level is 54% however significant disparities persist across provinces. Islamabad Capital Territory (ICT) has the highest GER in the middle at 91% while Balochistan has the lowest at a meager 21%. Provincial variations are evident with Punjab at 62%, Sindh at 42% and KP at 58%. At the national level, male GER in the middle is higher than girls (56% for males and 51% for females). Punjab displayed a reversed trend with a higher female enrollment ratio than male.

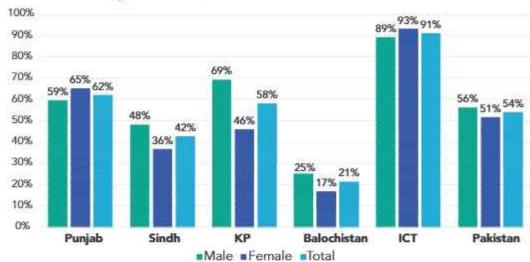

Figure 23: GER in Middle by Province and Gender - 2022-23

Gross Enrolment Ratio in High

The Gross Enrollment Rate (GER) for secondary education in Pakistan for 2022-23 is 43%. ICT leads with the highest GER at 73% followed by Punjab with 47%. Balochistan reports the lowest GER at 18%, underscoring significant challenges in accessing secondary education in the province. Sindh and KP have GERs of 39% and 44%, respectively. Gender differences persist in secondary school enrollment across all provinces and nationally. Generally, male enrollment rates exceed female enrollment rates except Punjab. Nationally, 45% of males and 40% of females are enrolled in secondary education.

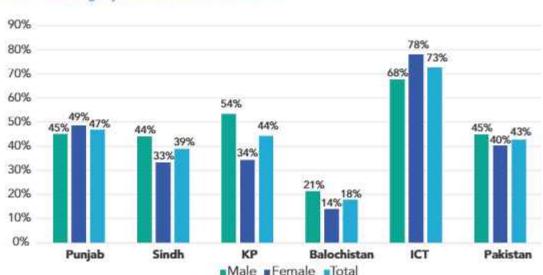

Figure 24: GER in High by Province and Gender - 2022-23

Gross Enrolment Ratio in Higher Secondary

The total GER in higher secondary education at the national level (Pakistan) is 22%. Gender disparities in enrollment persist in higher secondary education. Males generally have higher GERs compared to females across all the provinces except in Punjab and ICT. With a GER in higher secondary education of 74%, Islamabad Capital Territory (ICT) has the highest GER among the provinces/areas showing comparatively better access to this level of education. Balochistan has the lowest GER in higher secondary education at 12%, underscoring the province's severe barriers to enrollment at this level of education. GERs in higher secondary education in Sindh in 22% and KP is 24%. The highest gender gap is observed in KP with 13 percentage points.

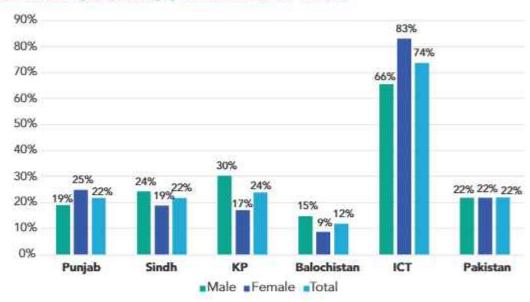

Figure 25: GER in Higher Secondary by Province and Gender - 2022-23

The Gross Enrollment Ratio (GER) in Pakistan reveals a concerning trend of decline as students progress from primary to higher secondary education levels. While primary education shows a steady GER of 78% in 2022-23, the trend shifts downward at higher levels with Middle GER at 54%, and GER for high level at 43%. The GER of 22% at the higher secondary stage is alarming. This trend highlights significant challenges in retaining students with the progression in education levels.

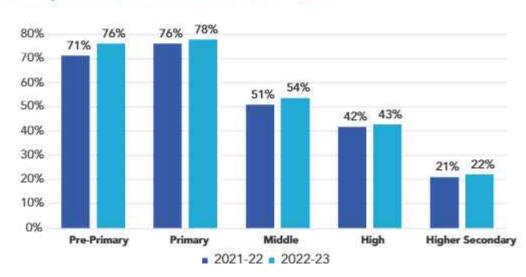

Figure 26: GER by Level of Education in Pakistan - 2021-22 and 2022-23

4.4 Overage Children in Primary and Middle

Students who are two or more years older than the expected or usual age for their school level are commonly referred as "overage children". The possible reasons, among others, can be late entry to school or repetition in grades without having negative implications on the students' part. However, the indication of a high number of overage students requires the attention of the education planners and policymakers as it may result in a lower level of students' learning achievements.

Pakistan has a national average of 63% overage children in the primary school and 65% in the middle school. This indicates a substantial number of students are older than the expected grade level for their age group. Balochistan has the highest percentage of overage children in both primary (71%) and middle school (81%). Lowest Percentage: Islamabad Capital Territory (ICT) has the lowest percentage in both primary (55%) and middle school (52%).

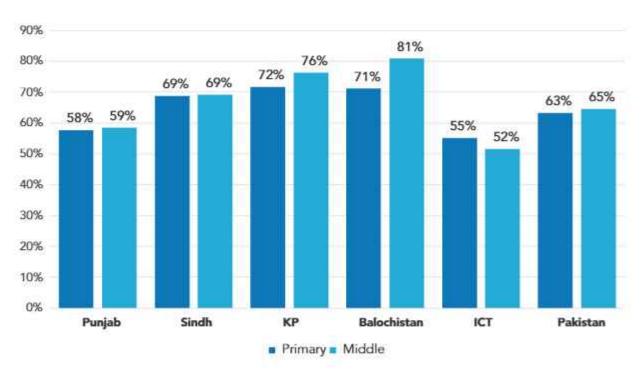

Figure 27: Percentage of Over-age Children in Primary and Middle by Province - 2022-23

The values of overage children indicator Percentage of overage children can better analyze in conjunction with Gross Intake Ratio (GIR) to first grade of primary and Survival Rate to grade-V. For example, Balochistan has the lowest GIR as compared with other provinces/regions showing late entry or no entry to school by majority of children. Likewise lowest Survival Rate to Grade-V of Balochistan also displays high dropout and repetition rates.

Out of School Children

Pakistan's efforts to achieve universal primary and secondary education continue to be hampered by the challenge of a high number of out-of-school children. The Pakistan Government complemented by the private sector has started initiatives in recent years to address the issue of out-of-school children. Programs designed to give low-income families financial incentives, upgrade school facilities, and increase awareness of the value of education, particularly for girls, have shown encouraging outcomes. Reducing the number of out-of-school children is not only a matter of ensuring access but also of fostering a more equitable and inclusive educational system that provides opportunities for every child in Pakistan.

Figure 28: Out of School Children in Pakistan by Stage (a) OOSR (b) OOSC in millions - 2022-23

At the overall level, which combines data from all educational levels, 38% of children in Pakistan are out of school. The out-of-school rates increase from primary to higher secondary education, 35% population portion of primary, 28% of middle, 41% of high, and 59% of higher secondary are out of school. Across all educational levels, there are gender disparities in outof-school children. At the primary level, 39% of females are out of school, compared to 32% of males. This gender gap widens at higher educational levels. In each category (primary, middle, high, and higher secondary), the percentage of out-of-school females is consistently higher than that of males. This trend suggests that the challenges and barriers to education intensify as students move to higher levels of schooling, which can have long-term implications for their educational attainment and life opportunities.

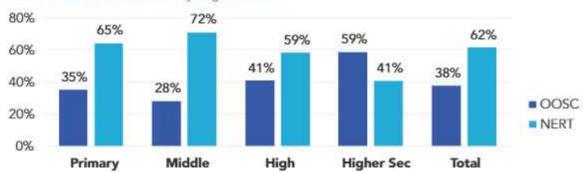

Figure 29: NERT and OOSR in Pakistan by Stage -- 2022-23

The total number of 26.089 million out-of-school children from primary to higher secondary education is significant, emphasizing the scale of the challenge. The majority of the OOSC are in primary level. There are 5.795 million out-of-school girls compared to 5.060 million out-of-school boys, resulting in a total of 10.855 million out-of-school children of the primary age group. 2.788 million girls compared to 2.062 million boys (a total of 4.850 million children) are out of school with the age group of middle education. A similar number is observed in the secondary education age group where 4.404 children are out of school of which 2.163 million are girls.

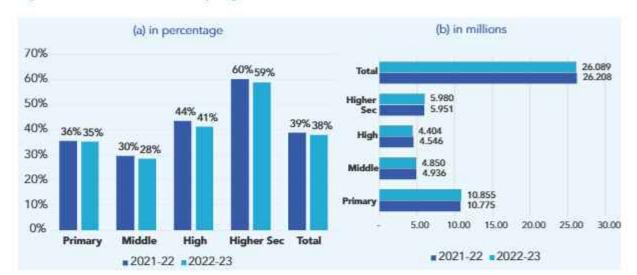

Figure 30: Out of School Children by Stage - 2021-22 and 2022-23 (a) OOSR (b) OOSC in millions.

The data highlights a mixed picture of progress and challenges in addressing OOSC. While there have been significant improvements in middle and high school access, the increase in primary-level OOSC and the persistence of higher secondary OOSC call for sustained efforts. The overall percentage of OOSC across all educational stages improved from 39% in 2021-22 to 38% in 2022-23. This indicates a positive trajectory of efforts to reduce the number of out of school children. At primary stage, the OOSC reached 35% in 2022-23 from 36% last year. There was a decline in OOSC at the middle stage, decreasing from 30% in 2021-22 to 28% in 2022-23. OOSC at the high school stage also witnessed reduction, dropping from 44% in 2021-22 to 41% in 2022-23. Progress has also been made at the Higher Secondary Level in declining OOSC from 60% in 2021-22 to 59% in 2022-23.

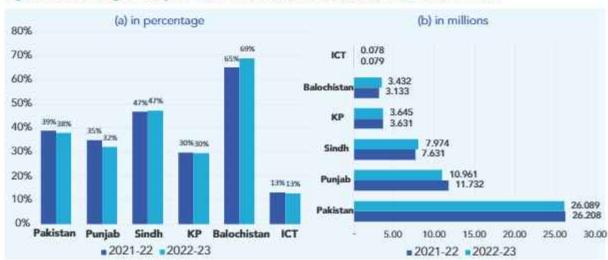

Figure 31: OOSC (Age 5-16) by Province - 2021-22 and 2022-23 (a) OOSR (b) OOSC in millions.

Primary

Punjab has the highest number of out-of-school children of the primary age group among all the provinces, with 4.311 million children out of school, evenly distributed between males (2.168 million) and females (2.143 million). In Sindh province, there are 3.584 million out-of-school children, with a notable gender gap. While 1.632 million males are out of school, the number rises to 1.952 million for females. Khyber Pakhtunkhwa (KP) has a total of 1.362 million out-of-school children, with a higher proportion of females (0.858 million) compared to males (0.504 million). Balochistan reports 1.549 million out-of-school children, with a distribution between males as (0.727) million and females as (0.813 million). The Islamabad Capital Territory (ICT) has the lowest number of out-of-school children, with only 0.059 million children out of school, equally split between males and females.

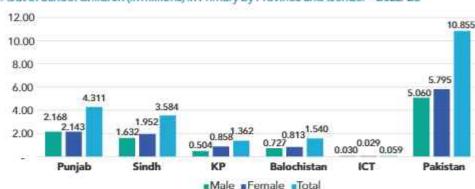

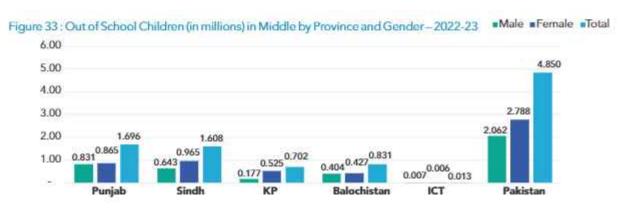

Figure 32: Out of School Children (in millions) in Primary by Province and Gender – 2022-23

Middle

Pakistan has a total of 4.850 million out-of-school children belonging to the age group for middle education, with 2.062 million being males and 2.788 million being females. Punjab has the highest number of out-of-school children for middle education, with a total of 1.696 million. The gender breakdown shows that 0.831 million are males, and 0.865 million are females. Sindh follows with a total of 1.608 million out-of-school children in middle education. The gender distribution reveals that 0.643 million are males, while 0.965 million are females. KP and Balochistan have relatively lower number of out-of-school children with 0.702 and 0.831 million children respectively. In KP, 0.177 million are males, and 0.525 million are females, whereas in Balochistan, 0.404 million are males, and 0.427 million are females. Islamabad Capital Territory (ICT) has the lowest number of out-of-school children at this level of education with only 0.013 million for both males and females.

High

Nationally there are 4.40 million OOSC in the age group for secondary education with 2.24 million males and 2.16 million females. In Punjab, 1.911 million children are out of school, comprising 1.108 million males and 0.803 million females. Sindh reports 1.295 million OOSC, with 0.626 million males and 0.669 million females. Khyber Pakhtunkhwa (KP) follows with 0.668 million OOSC, split into 0.244 million males and 0.424 million females. Balochistan faces challenges with 0.526 million OOSC, including 0.260 million males and 0.266 million females. In contrast, Islamabad Capital Territory (ICT) has a significantly lower number, with only 0.004 million OOSC.

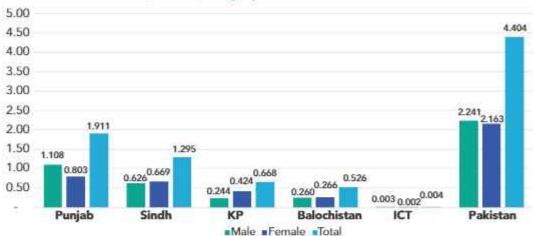

Figure 34: Out of School Children (in millions) in High by Province and Gender - 2022-23

Higher Secondary

There are 5.980 million out-of-school children within the higher secondary age bracket. Among them, 3.014 million are male, and 2.966 million are female. In Punjab, the number of out-of-school children in this age group is 3.043 million, with males accounting for 1.614 million and females for 1.429 million. Sindh has a total of 1.487 million out-of-school children in the higher secondary age range, evenly divided between males (0.734 million) and females (0.753 million). Khyber Pakhtunkhwa (KP) reports 0.913 million out-of-school children in this age category, with 0.391 million males and 0.521 million females. Balochistan has recorded 0.535 million out-of-school children in the higher secondary age group, comprising 0.274 million males and 0.261 million females. Islamabad Capital Territory (ICT) has the lowest number of out-of-school children at just 0.002 million, with negligible gender differences.

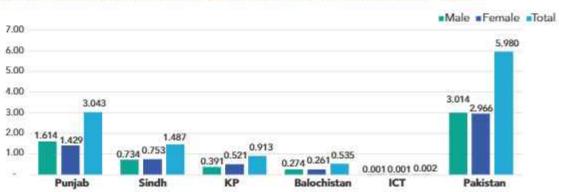

Figure 35: Out of School Children (in millions) in Higher Secondary by Province and Gender – 2022-23

Effective Transition Rate

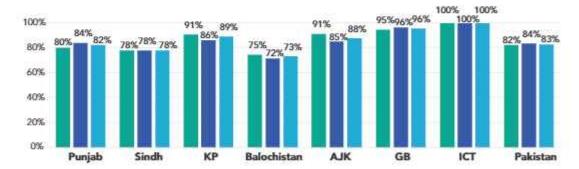

The education indicator "Effective Transition Rate" commonly referred to as ETR, serves as a metric to evaluate the progression of individuals from one educational or training stage to the next. Alongside assessing access to higher levels of education, these rates assist education policymakers and institutions in monitoring the paths students take after completing a particular level of education. Through an analysis of transition rates, it becomes possible to pinpoint where students or individuals might be discontinuing their education journey.

Primary to Middle

ETR from primary to middle at the national level is 83% (82% for males and 84% for females). ICT, AJK, and GB have the highest transition rates, all achieving 100% for both genders. This indicates all students progressed to middle school. KP also demonstrates a high transition rate, with 91% for males and 86% for females. Balochistan shows a 75% rate for males and 72% for females, while Sindh has a 78% rate for both genders. Punjab shows a positive trend with a higher transition rate for females (84%), as compared to males (80%). However, other provinces like KP and Balochistan have a slight gender gap with more males transitioning from the primary to the middle level, than females.

Figure 36: ETR from Primary to Middle by Province and Gender - 2022-23

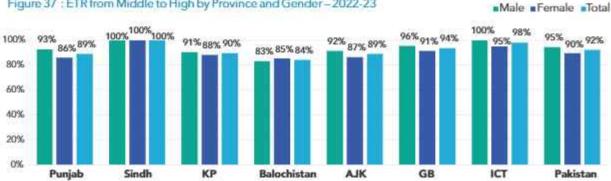

Middle to High

The overall ETR from middle to secondary education in Pakistan stands at 92%. Among males, this rate is slightly higher at 95%, while among females, it is slightly lower at 90%. Sindh has the highest overall effective transition rate (100%), followed closely by ICT (98%) and GB (94%). Balochistan has the lowest ETR (84%), followed by Punjab (89%) and AJK (89%). ETR for KP is 90%

Figure 37: ETR from Middle to High by Province and Gender - 2022-23

4.7 Survival Rate to Grade-5

The national survival rate for Grade 5 stands at 80%, with males at 80% and females at 81%. Punjab reports a survival rate of 78%, with males at 75% and females at 80%. Sindh shows a survival rate of 88%, with males at 87% and females at 90%. KP records a survival rate of 85%, with males at 90% and females at 77%. Balochistan indicates a survival rate of 52%, with males at 53% and females at 50%. AJK has a survival rate of 79%, with males at 75% and females at 82%. GB demonstrates a high survival rate of 95%, with males at 93% and females at 99%. ICT has a survival rate of 97%, with males at 100% and females at 93%.

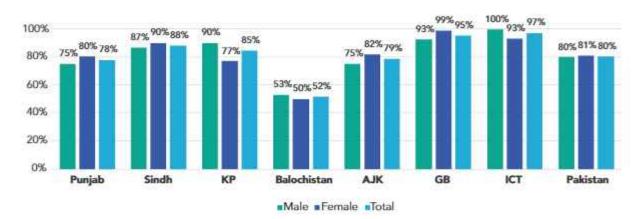

Figure 38: Survival Rate to Grade-5 by Province and Gender - 2022-23

4.8 Pupil-Teacher Ratio

Pakistan has Pupil-Teacher Ratio (PTR) of 32, indicating an average of 32 students per teacher across all education levels. Punjab has the highest PTR of 42 at the primary level, while GB has the lowest at 27. KP displayed an exceptional PTR of 13 in middle schools followed by GB (23) while Sindh has the highest PTR (22) at this level. Balochistan shows a PTR of 20 in high school, but Sindh has the highest PTR (40) in higher secondary education. Islamabad Capital Territory (ICT) consistently has the highest PTR across all levels except middle school.

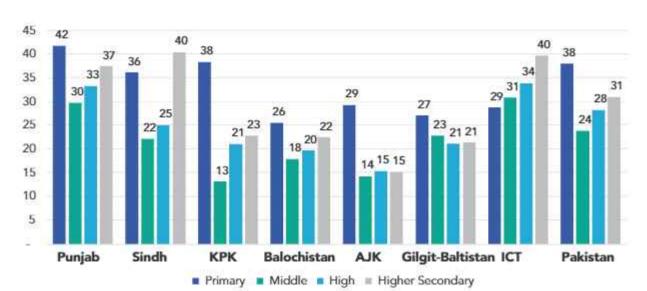

Figure 39: PTR by Province and Level - 2022-23

CHAPTER 5

LEARNING ENVIRONMENT: INFRASTRUCTURE AND FACILITIES

Highlights

The national average teacher-school ratio for Pakistan is 5, providing an overview of teaching workforce distribution. ICT has the highest teacher-school ratio, while Balochistan has the lowest in Pakistan.

Pakistan's overall primary-level pupil-classroom ratio is 37. Balochistan has the lowest pupilclassroom ratio at the primary level while KP has the highest.

ICT has the highest teacher-school ratio with an average of 13 teachers per school, in contrast to Balochistan, which reports the lowest ratio at just 3 teachers per school, while the national average teacher-school ratio for Pakistan stands at 5.

Around 67% of schools in Pakistan have access to electricity. There are disparities among provinces, with Punjab and ICT having high access, while Balochistan consistently lags.

Punjab and ICT have 99% and 100% of primary schools equipped with water facilities respectively but Balochistan faces challenges, with only 23% coverage.

Toilet access in schools varies widely among provinces. Punjab, KP, and ICT have high coverage, but Balochistan struggles with only 44% access at the primary level.

Pakistan maintains a moderate level of boundary wall facility in schools with Punjab, KP, and ICT leading in this aspect.

As schools progress to higher levels, there is an increase in the availability of electricity, drinking water, toilets and boundary walls.

The standard of school infrastructure is directly related to the total level of instruction. The quality of instructions and learning can be enhanced by well-designed classrooms, provision of basic facilities, and well-maintained equipment and learning material. Facilities for schools and infrastructure are crucial elements of an all-encompassing education system. They enhance the general standards of universal education and the wellbeing of pupils in addition to providing a secure and comfortable learning environment. The long-term growth and success of students as well as the success of society at large depend on investments made in these areas of education. Sufficient infrastructure guarantees students' comfort during instruction. For students' health and wellbeing, proper sanitation facilities, clean drinking water, and hygiene practices are crucial.

5.1 Pupil-School Ratio

The pupil-school ratio in Pakistan is 165. ICT has the highest pupil-school ratio with an average of 440 pupils per school and Balochistan has the lowest pupil-school ratio among the regions, with an average of 69 pupils per school. There is a significant variation in pupil-school ratios among different provinces/areas in Pakistan. This variation can be attributed to the factors such

as population density, educational infrastructure, etc. A lower pupil-school ratio is generally considered favorable as it suggests smaller class sizes and potentially better individualized attention to students. However, a lower ratio also requires more schools and resources, which can be challenging in areas with limited infrastructure and resources like Balochistan. Policymakers can use this data to prioritize and allocate resources more effectively to improve education access and quality across regions. population density, educational infrastructure, etc.

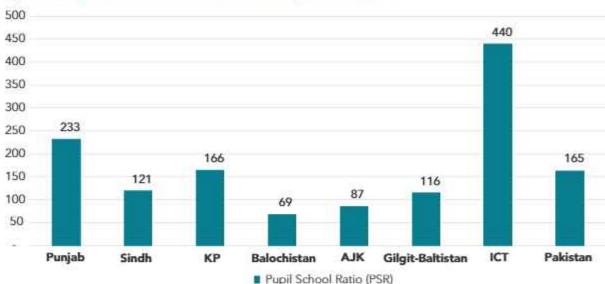

Figure 40: Pupil-School Ratio in Government Schools by Province - 2022-23

5.2 Teacher School Ratio

In Pakistan, the average teacher-to-school ratio is 5. This average offers a broad overview of the workforce distribution of teachers at educational institutions. With an average of 13 instructors per school, Islamabad Capital Territory (ICT) has the highest teacher-to-school ratio. This suggests that there are comparatively more teachers available in the capital city for each school. With an average of three instructors per school, Balochistan has the lowest teacher-school ratio of any province or territory.

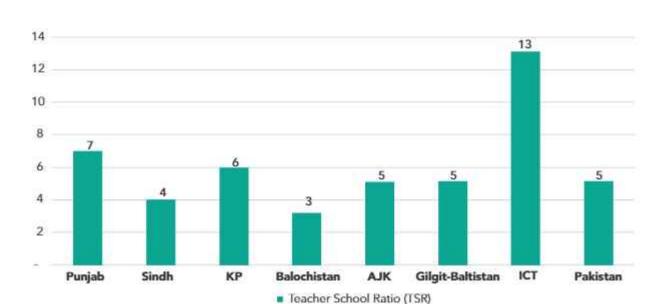

Figure 41: Teacher-School Ratio in Government Schools by Province - 2022-23

5.3 Pupil-Classroom Ratio

The PCR increases significantly from primary to higher secondary levels. At the primary level, Balochistan has the lowest pupil-classroom ratio at 19 in primary level while Sindh and KP have the highest with 40 and 41 respectively. Punjab, AJ&K, and ICT have similar ratios, ranging from 33 to 38 students per classroom. GB stands at 40. Overall Pakistan has a ratio of 37 students per classroom at the primary level. Punjab has the highest ratio at 36 and Balochistan has the lowest pupil-classroom ratio at 23 in middle education. The other provinces/regions have ratios ranging from 24 to 35 students per classroom. Sindh has the highest ratio at 48 whereas Balochistan is the lowest with 31 at the secondary education level. A similar trend is followed at higher secondary level.

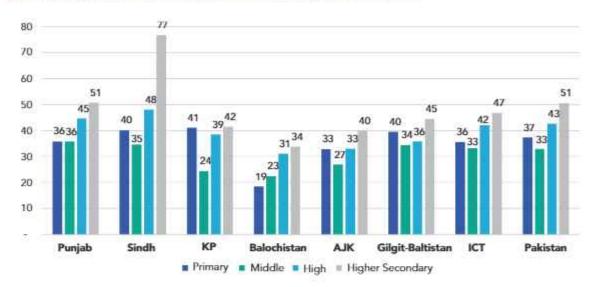

Figure 42: Pupil-Classroom Ratio in Government Schools by Province - 2022-23

The data on PCR reveals contrasting trends across different education levels between 2021-22 and 2022-23. In primary and middle education, the PCR remained the same for both years. In Secondary and higher secondary education, the PCR witnessed a decrease from 45 to 43 and 52 to 51 respectively during the same period.

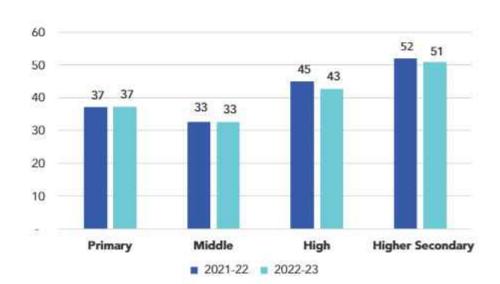

Figure 43: Pupil-Classroom Ratio in Government Schools - 2021-22 and 2022-23

5.4 Schools with Electricity Facility

The data on the percentage of government schools with electricity reveals significant disparities. Nearly all schools in Punjab and ICT have electricity facilities across all educational levels. Punjab maintains a high standard with 98% of primary schools and 100% of middle, high, and higher secondary schools equipped with electricity. Similarly, 100% of schools have electricity showcasing a strong infrastructure and resource allocation.

Conversely, Balochistan and Sindh lag significantly, particularly at the primary level. In Sindh, only 27% of primary schools have electricity, and while this figure improves to 88% at the higher secondary level, it still indicates a substantial gap in basic infrastructure for younger students. Balochistan presents an even more challenging scenario with only 15% of primary schools and 78% of higher secondary schools having electricity. Other provinces/areas like KPK, AJK, and Gilgit-Baltistan show improved performance, especially at higher educational levels, but still highlight considerable room for improvement. Nationwide, while 62% of primary schools have electricity, the figure rises to 95% at the higher secondary level, indicating a prioritization of resources towards higher education, however, underscoring the need for more balanced infrastructure development at all levels.

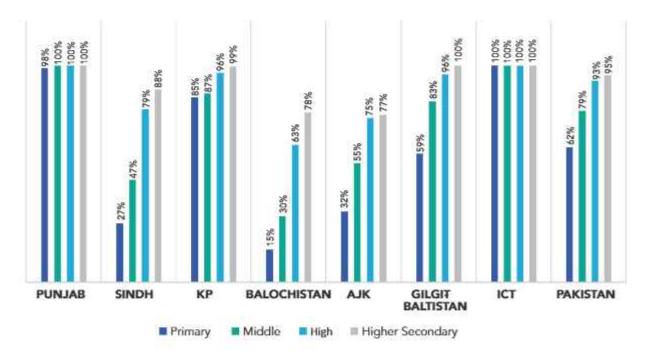

Figure 44: Percentage of Government Schools with Electricity by Province and Level -2022-23

5.5 Schools having Drinking Water

At the national level 72% of primary, 83% of middle, 95% of high and 96% of higher secondary schools have access to drinking water. This is essential for student health and well-being, promoting a conducive learning environment. Almost all the schools of ICT and Punjab have drinking water available. Balochistan and AJK have significantly lower rates, particularly at the primary level (only 23% for both).

KP shows strong performance across all levels, particularly at the higher secondary level, reflecting effective resource allocation and infrastructure development. AJK and Gilgit-Baltistan demonstrate notable progress, especially at higher educational levels, but still reveal gaps at the primary and middle levels.

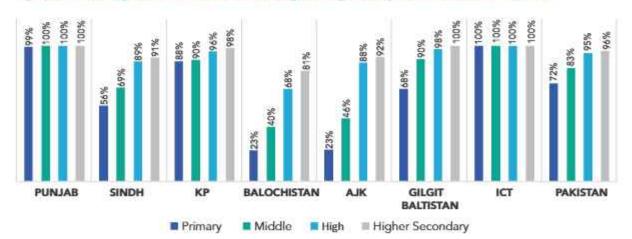

Figure 45: Percentage of Government Schools having Drinking Water by Province and Level - 2022-23

5.6 Schools with toilet facility

Punjab, KP (Khyber Pakhtunkhwa), and ICT (Islamabad Capital Territory) provide toilet facilities in 99%, 86%, and 100% of schools at the primary level. However, only 40% of primary schools in Balochistan have access to toilets. Pakistan, as a whole, achieves a moderate level of 74% access to toilets at the primary level. Middle schools in Sindh, KP, and GB (Gilgit-Baltistan) provide relatively high access to toilet facilities, with percentages ranging from 74% to 92%. The national average for toilet access stands at 89% for middle schools and 97% for high schools. At the higher secondary level, GB stands out with 96% of its schools offering toilet access whereas 81% of schools of AJ&K have access to toilets at this level. Overall, Pakistan maintains a high level of 98% access to toilets at the higher secondary level.

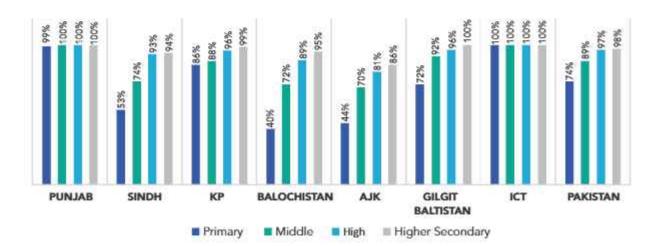

Figure 46: Percentage of Government Schools with Toilets by Province and Level – 2022-23

5.7 Availability of Boundary Wall in Schools

Nationally, there is a clear trend of increasing coverage of boundary walls as the educational level rises, with primary schools lagging, suggesting the need for more balanced and equitable infrastructure development to ensure student safety across all levels. Punjab and ICT consistently achieve near-universal coverage for boundary walls across all educational levels. Sindh and Balochistan face significant challenges at the primary level but show substantial improvements at higher educational levels. KPK shows consistently high percentages across all levels. AJK faces significant challenges, especially at the primary and middle levels, with a large percentage of schools with missing boundary walls. Gilgit-Baltistan shows good progress, particularly at higher levels, however, there is still a need for improvement at the primary level.

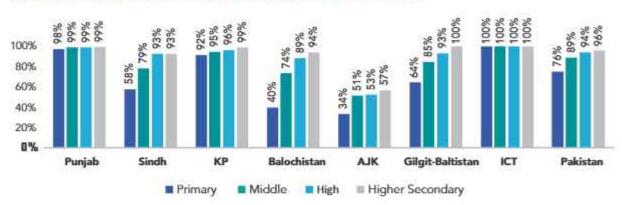

Figure 47: Percentage of Government Schools having Boundary Wall - 2022-23

The comparison of school facilities between the years 2021-22 and 2022-23 indicates mixed trends. Electricity availability in public schools has seen a slight decrease from 70% to 67% during this period. Similarly, Schools with drinking water reached 76% in 2022-23 from 78% in 2021-22. Likewise, there is a decrease from 79% to 78% in the availability of toilets in public schools during the same period. The percentage of schools having boundary wall facilities remained the same.

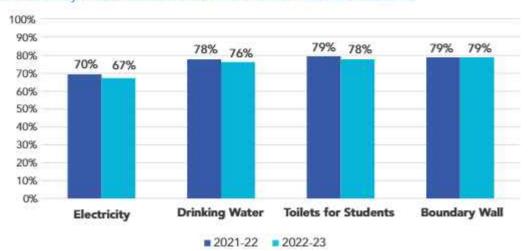

Figure 48: Availability of Basic Facilities in Government Schools - 2021-22 and 2022-23

CHAPTER 7

REGIONAL COMPARISON

Highlights

Pakistan has the second-highest GER in pre-primary education in South Asian countries, indicating relatively strong early childhood education compared with other countries of region.

Pakistan, along with Sri Lanka and Bangladesh, allocates a relatively low percentage of its GDP to government education expenditure.

Pakistan faces a serious challenge with the highest out-of-school rate in primary education among South Asian countries.

Pakistan faces literacy challenges, particularly among adults, having the lowest literacy rates in South Asian countries after Afghanistan.

Pakistan, like other South Asian countries, experiences gender disparities in education, with completion rates generally higher for males than females.

Pakistan boasts a high net enrolment rate adjusted one year before primary entry (94%), placing it among the top performers in the region slightly behind the highest 95% enrolment rate in India.

Pakistan's Human Development Index (HDI) ranking is 164 which is second lowest in South Asian countries after Afghanistan (182). Pakistan is placed in the low human development category.

For an effective education service delivery there is a need of a thorough examination of the current system at both national and local levels. This analysis is crucial for designing interventions that promote equitable access to education. By doing this, Pakistan can fulfill its constitutional obligations and educational goals outlined in national policies, plans, and federal/provincial government priorities. To achieve this, a robust data system capturing information across all educational aspects and sub-sectors is essential. This data is also necessary to benchmark Pakistan's progress against its South Asian neighbors. As a member of the South Asian Association for Regional Cooperation (SAARC) and part of UNESCO's Central and Southern Asia categorization, Pakistan has a natural context for such a comparison. Analyzing regional education indicators can pinpoint areas where Pakistan's system can improve.

Chapter 4 offers a comprehensive examination of Pakistan's educational landscape, utilizing education indicators analyzed at both national and provincial/area levels. The analysis is based on population data from the Pakistan Bureau of Statistics (PBS) and the National Institute of Population Studies (NIPS), shedding light on how education is evolving across various demographic groups.

In this chapter, Pakistan's position in education within the context of South Asian countries is explored in depth. The data for these indicators has been gathered from various international

reports, such as the UNESCO Global Education Monitoring (GEM) Report and the UNDP Human Development Report (HDR). It's important to note that the indicators published in these reports are based on UN population projections, ensuring a robust and globally comparative analysis.

It is worth noting that slight variations are observed in the values of education indicators between the national and South Asian chapters. These differences can be attributed to the utilization of distinct population projections, particularly in the latter chapter. Therefore, when interpreting and utilizing the data presented in our report, it is important to take into consideration the influence of these varying population projections.

6.1 Public Financing in Education

Pakistan's government education expenditure is 2.1% of GDP, which is relatively low compared to other South Asian countries like Bhutan, India, and Nepal. Bhutan leads with 7.0%, indicating a strong commitment to education relative to its GDP. Bangladesh allocates the least with 1.8%.

The education share of total government expenditure in Pakistan is 11.6%, which is higher than that of Afghanistan but lower than that of Iran, Bhutan, and India. Iran dedicates 22.7% of its total government expenditure to education. Afghanistan spends the least at 8.2%.

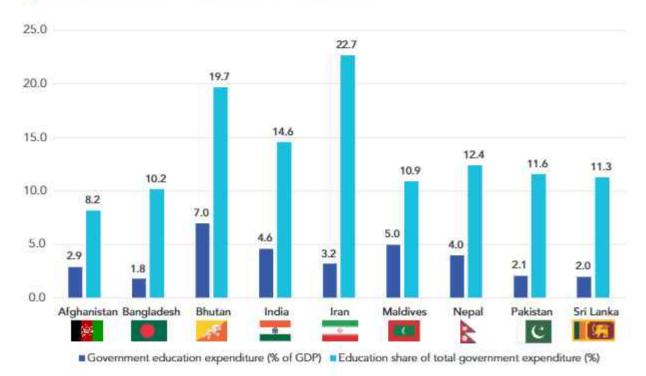

Figure 49: Public Investment in Education in South Asian Countries

6.2 Net Enrolment Rate Adjusted one year before primary

Pakistan has a high net enrolment rate of 94%, just slightly below India and higher than most other countries in the region. India has the highest net enrolment rate at 95% whereas Iran has the lowest rate at 64%. Bangladesh and Maldives also have high enrolment rates at 91% and 92%, respectively. Bhutan (85%) and Nepal (71%) show moderate levels of early enrolment.

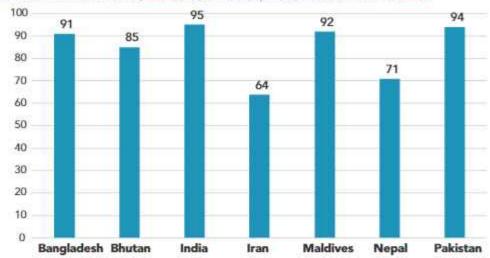

Figure 50: 8.2 Net Enrolment Rate Adjusted one year before primary in South Asian Countries

Source: Global Education Monitoring Report 2023/24

6.3 Out of School Rate

Pakistan has a significantly high out-of-school rate at the primary level, with 35% of children not attending school. Compared to Pakistan, countries like India and Sri Lanka have lower primary out-of-school rates. At the lower secondary level, Pakistan's out-of-school rate is 28%, which is still a considerable challenge. Bhutan, Bangladesh, and Nepal have relatively higher enrollment rates in lower secondary education compared to Pakistan. Pakistan faces the highest out-of-school rate among the selected countries at the upper secondary level, with 50% of students not attending school beyond lower secondary education. Access to upper secondary education in Pakistan appears to be substantially limited as compared to countries like Iran, Sri Lanka, and even Bangladesh.

Afghanistan Bangladesh Bhutan

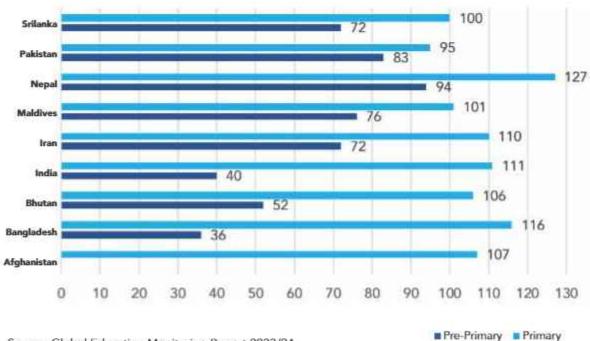

⁽ii) The OOSC values for Pakistan are not available in Global Education Monitoring Report 2023/24 therefore, values presented earlier in this report based on National EMIS Database 2022-23.

6.4 Gross Enrolment Ratio in Pre-Primary and Primary

Nepal takes lead with the highest Pre-Primary Gross Enrollment Ratio (GER) of 94%, followed by Pakistan (83%). The Maldives, Iran, and Sri Lanka also attained GERs above 70%, indicating active participation in early childhood education. However, India lags with a GER of only 40%.

In primary education, Nepal maintains its lead with a GER of 127%, followed by Bangladesh at 116%. Iran and India also perform well with GERs above 110%. Bhutan, Sri Lanka, and the Maldives all have GERs above 100%, indicating more children enrolled than the age-appropriate population. Pakistan, with a GER of 95%, trails behind some South Asian countries.

Figure 52: GER in Pre-Primary and Primary Education in South Asian Countries

6.5 Children Under-5 Experiencing Stunting (%)

Pakistan has the highest percentage of stunting among children under five at 35%, closely followed by Afghanistan at 34%. Iran has the lowest rate at 5%, indicating significantly better child nutrition and health conditions, as compared to its regional counterparts. Bhutan (23%), Maldives (14%), and Sri Lanka (16%) have relatively lower stunting rates. This high rate of stunting reflects underlying issues such as malnutrition, poor healthcare access, and socioeconomic factors affecting child health.

Sri Lanka 16 Pakistan 35 Nepal 28 Maldives 14 Iran 5 India 23 Bhutan Bangladesh 28 Afghanistan 34 0 5 10 15 20 25 30 35

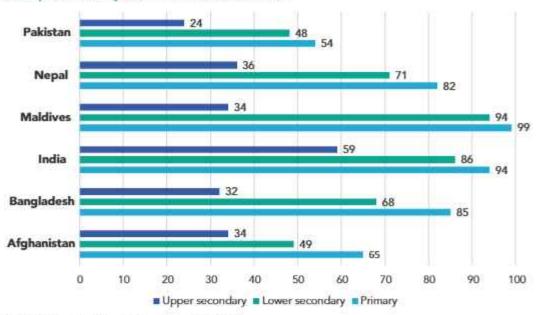

Figure 53: Children under-5 experiencing stunting (%) in South Asian Countries

Source: Global Education Monitoring Report 2023/24

6.6 Completion Rates in Primary and Lower Secondary

In general, completion rates tend to decrease as students progress from primary to lower secondary and upper secondary levels. Maldives stands out with exceptionally high primary completion rates at 99%, followed by India at 94%. Bangladesh also has a high primary completion rate at 85%. India has the highest completion rates in lower and upper secondary followed by Nepal at both levels. Afghanistan and Pakistan have the lowest lower secondary completion rates in all three education levels.

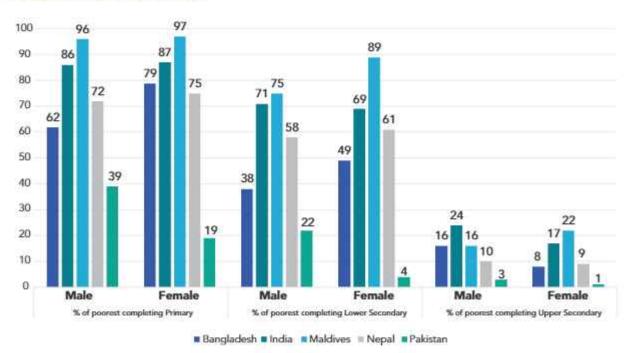

Figure 54: Completion Rate by Level in South Asian Countries

Source: Global Education Monitoring Report 2023/24

In all South Asian countries, the completion rates for males are generally higher than for females across all education levels. Maldives stands out with relatively high primary completion rates for both males (96%) and females (97%) among the poorest students. India demonstrates relatively balanced completion rates between males and females, with only a slight gender gap, especially in primary and lower secondary levels. Pakistan faces significant challenges in ensuring completion, particularly among the poorest students. The completion rates are lowest in the region for both genders across all levels of education, with a substantial gender gap.

Figure 55 : Percentage of Students belong to Poorest Families Completing Primary, Lower Secondary and Upper Secondary in South Asian Countries

6.7 Transition rate from primary to lower secondary

India (91%), Maldives (95%), and Pakistan (83%) exhibit high transition rates, showing effective educational continuity and student retention during this critical phase. Nepal has a transition rate of 87% while Bangladesh (79%) and Afghanistan (75%) have the lowest rates in South Asian countries.

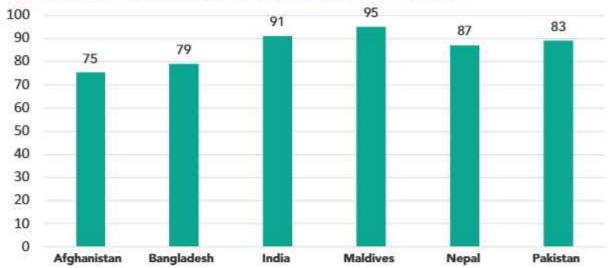

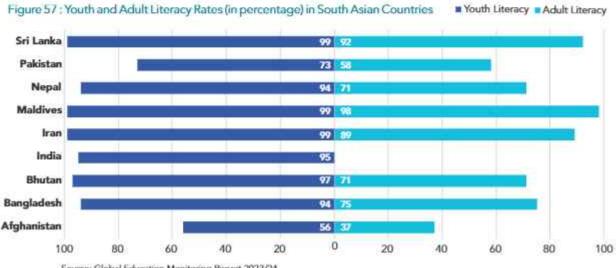

Figure 56: Transition Rate from Primary to Lower Secondary (%) in South Asian Countries

Source: Global Education Monitoring Report 2023/24

6.8 Youth and Adult Literacy

The comparative analysis of youth and adult literacy rates highlights the progress made in some countries while underscoring the challenges in others. Continued investment in education and targeted literacy programs are essential for promoting inclusive and sustainable development in these countries. Iran, Maldives, and Sri Lanka have exceptionally high youth and adult literacy rates, all exceeding 95%. Bhutan, Bangladesh, and India also have relatively high youth literacy rates, ranging from 94% to 97%. Afghanistan, Nepal, and Pakistan have lower youth literacy rates, ranging from 56% to 94%. Afghanistan and Pakistan have lower adult literacy rates, ranging from 37% to 58%. No data is available for India on adult literacy.

6.9 Education Attainment of Adults aged 25+

A clear disparity emerges when examining educational attainment across South Asian countries. Bangladesh (63%), India (61%), and Pakistan (50%) show decent access to primary education, while Afghanistan faces significant barriers at this crucial first step (15%). Sri Lanka (82% to 64%) and India (61% to 49%) demonstrate success in transitioning students from primary to lower secondary levels. However, both Pakistan with (50% to 26%) educational attainment rate and Afghanistan (15% to 12%) educational attainment rate, experience substantial drop-offs after primary education, with Sri Lanka maintaining a stronger continuity in education. Continuing education presents even greater challenges, with Afghanistan (12% to 9%) and Pakistan (26% to 12%) struggling to keep students enrolled in upper secondary education. Access to higher education remains limited across the board, though Bangladesh (16%), Bhutan (11%), and India (13%) offer slightly better opportunities compared to primary schooling (around 4-5% for Afghanistan and Pakistan).

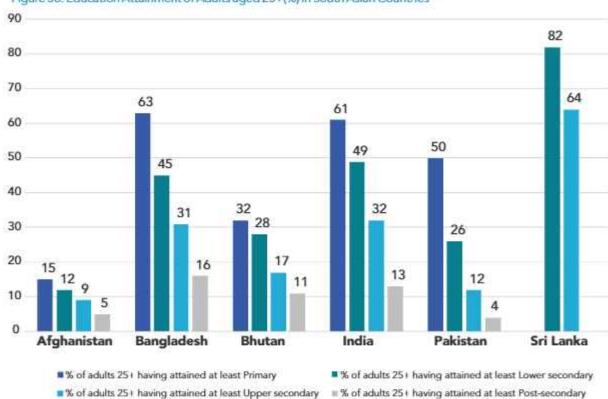

Figure 58: Education Attainment of Adults aged 25+(%) in South Asian Countries

6.10 Human Capital Index

Iran and Sri Lanka both have the highest Human Capital Index values in South Asia at 0.6 indicating human capital with better health and education. Bhutan Bangladesh, India and Nepal also indicate moderate human capital development with HCI at 0.5. Pakistan and Afghanistan have the lowest HCI of 0.4 in south Asian region.

^{*}Enrolment by Stage defined as those students who are enrolled in one particular section of the school. For example primary stage enrolment not only includes classes 1 to 5 of Mosque & Primary school but it also includes primary section of Middle, High & Higher Secondary schools

** Public Private Partnership

- 1. Other Public Sector means Public Institutions run by Public Sector other than MoFE&PT and Provincial/Regional Education Departments. Source:
- 1. Public Sector data is provided by Provincial/Regional EMISs.
- 2. Private sector data is provided by provincial/regional education departments except Punjab.
- Private sector data for Punjab is estimated based on past trend.
 Data related to Other Public Sector, Education Foundation and Non-Formal Education is provided by respective organizations.
- 5. Public sector Intermediate & Degree Colleges data is provided by Provincial/Regional Colleges/Higher Education Departments.
 6. Private Sector Intermediate & Degree Colleges data is provided by Punjab and KP whereas it is estimated based on past trend for other provinces/regions.
- 7. Teacher Training Institutions data is estimated using past trend
- 8. Deeni Madaris data is provided by Madaris bodies (Wafaqs), Pakistan
- 9. Technical & Vocational Institutions data is provided by National Vocational & Technical Training Commission (NAVTTC), Islamabad
- 10. Universities/DAIs data is provided by Higher Education Commission (HEC), Islamabad.
